Getting Started

Welcome to Performance Manager! Your company has chosen one of the most powerful, versatile, and easy-to-use performance management systems available for the healthcare industry today.

Before diving into Performance Manager, let's review system requirements and some basic concepts about general system use to help you understand system workflows, navigation, and functionality.

- [System requirements](#). Make sure you have the latest and greatest browsers so you're able to take full advantage of all the features and functionality we offer.
- [Interface basics](#). The navigation bar provides all the links and icons to features you need so you can locate information and get work done quickly.
- [New user registration](#). You'll need to register before you can log in, so start here. It's done in a few simple steps.

System requirements

At HealthcareSource, our goal is to provide the best possible user experience across the wide range of desktop and smart device browsers. To achieve this goal, we prioritize supporting browsers with the most advanced technology. Our solutions are designed to function with the browser versions we've identified in the chart below as **A-Grade** — we actively test on these browsers to optimize user experience.

HealthcareSource recognizes that some legacy browsers, which we've identified as **X-Grade**, don't provide the technology needed to deliver new features with a modern user experience. In order to continue providing the best solutions and support, we've decided to discontinue support for these X-Grade browsers.

In addition, there are browser versions for which we provide limited support, identified below as **C-Grade**. While we don't regularly test this set of browser versions, customers have found them to work well with our software. Problems reported with these versions may be addressed, but we cannot make specific commitments as to if or when a fix will be available. In some cases, we know of select features or functionality that don't work with these browsers. We do our best to document those cases and make this information available upon request.

By prioritizing A-Grade browsers and discontinuing the support of X-Grade browsers, HealthcareSource can release features more frequently, provide better support, and resolve issues faster. Since Microsoft stopped supporting Internet Explorer 8 in January 2016, we predict that most healthcare organizations will be migrating to newer browsers. However, there are limited options for those who decide to continue using these legacy browsers. For more information, contact support@healthcaresource.com.

Note: Customers requiring Microsoft IE 8 for legacy applications should consider Microsoft Internet Explorer Enterprise Mode.

Please check back with us if you have questions on browser support. We're constantly upgrading our solutions to make them more browser agnostic — this work is ongoing and incremental. We'll notify customers when browser support changes.

A-Grade	C-Grade	X-Grade
Optimal user experience	Adequate user experience	Not supported
HealthcareSource actively tests all A-Grade browsers and reported bugs are addressed with high priority.	HealthcareSource tests a sampling of C-Grade browsers periodically and reported bugs are addressed with high priority.	HealthcareSource doesn't test X-Grade browsers or address reported bugs. There may be limited user experience.
Microsoft Edge*	Microsoft IE 9	Microsoft IE 8 and below
Microsoft IE 11	Mozilla Firefox*	Microsoft IE 10
Google Chrome*		Browsers not listed are X-Grade
Apple Safari*		

*Latest versions

New user registration

As with most software solutions these days, Performance Manager requires a username and password in order to log in and access the site. But what if you're a new user and don't have either of those things yet? No worries. A quick registration process is all that's needed for you to retrieve your username and create a password so you can log in and get stuff done.

Let's dive in, shall we?

1. Click the **Register** link on the main login page for Performance Manager.

HealthcareSource 
Performance Manager®

Username

Password

Log In ➔

[Register | Trouble signing in?](#) ▾

2. The page reloads and asks for your **First Name**, **Last Name**, and **Employee ID** number. Enter these into the text fields and click **Next**.

HealthcareSource 
Performance Manager™

Identity Verification (Step 1 of 4)

*First Name (proper)

*Last Name

*Employee ID

* indicates required field

Next

3. The next form asks for your **Username**. Make sure to enter a username that follows the guidelines set by your organization. Click **Next** when finished.

HealthcareSource 
Performance Manager™

Username (Step 2 of 4)

*Username

Username Rules:

- Usernames are case insensitive.
- Username should be a minimum of 8 characters and a maximum of 23 characters in length.

* indicates required field

4. Next up is the password. Enter a password for your account and confirm it, making sure to follow those guidelines again. Click **Next** when finished.

HealthcareSource 
Performance Manager™

Password (Step 3 of 4)

*New Password

*Re-type New Password

Password Rules :

- Passwords should not contain your Username, First Name, Last Name or Employee ID.
- Passwords should not be the same as any of the last three passwords used.
- Passwords should be a minimum of 6 characters and a maximum of 15 characters in length.
- Passwords should contain one of the following special characters: !@#\$%^&*()_+={}[]\|;:.,?`
- Passwords should contain a number

* indicates required field

5. Last step is the security questions. Security questions are used to help you retrieve your username and/or password in the future if you should ever have trouble remembering. Three default questions are selected, but you can choose different ones from the drop-down lists. Make sure to select questions and provide answers that you can remember!

When you've completed all the necessary fields, click **Next** to complete the registration process.

HealthcareSource 
Performance Manager™

New Security Questions (Step 4 of 4)

Please select questions from the dropdown list.

*Question 1:

*Question 2:

*Question 3:

* indicates required field

The page reloads again to display a message stating you have successfully registered. Nice job! You can now click the available **Login** button to return to the main login page and log in using the displayed username and password you just created.

Interface Basics

The navigation bar found at the top of the screen in Performance Manager contains all the links and icons for accessing the various areas and features of the system. From the drop-down menu items to the icons and breadcrumbs in the lower bar, this provides an easy way to get to the features you need.

- a. [Available areas](#). The main items in the navigation bar allow you to access different features throughout Performance Manager. Access to these items are controlled by system-wide permission sets, so you may not see all the options listed here. In fact, most employees only have access to the **My Folder** item.

- b. [User menu](#). The user menu is the one that has your name on it - so hopefully it's pretty obvious which one we're referring to. This menu provides access to several *Settings* pages that control your account security and other system options, along with the system's **Log Out** link.
- c. [Help menu](#). The *Help* and *Release Notes* options under this menu item launch the online help system in a new browser window or tab. The selected option determines which page of the online help system is displayed once opened. Clicking the *Support* option takes you to the HealthcareSource Community Support portal.
- d. **Back button**. This button merely takes you back to the previous page you were viewing. We recommend using this button instead of your browser's Back button when navigating around Performance Manager.
- e. [Inline help](#). The  icon opens the inline help window for the page you're currently viewing. These windows provide smaller chunks of help material so you can get past those sticking points without having to dive into the full help system for answers.

Navigation areas

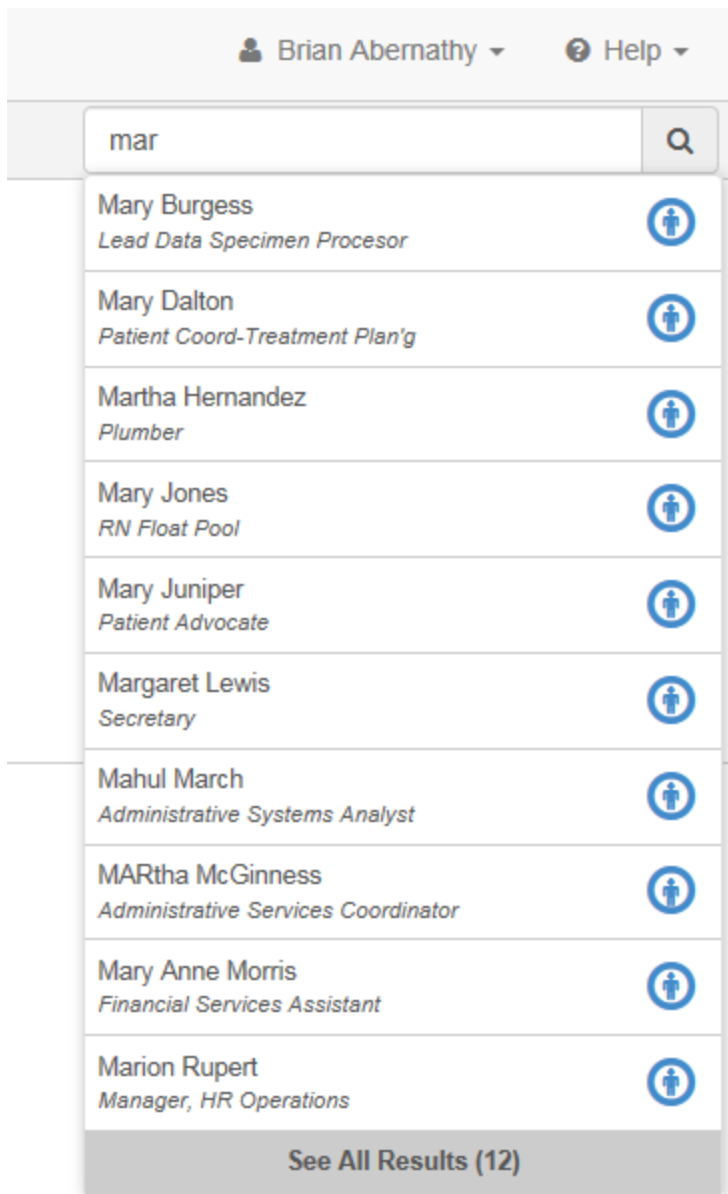

The main navigation bar has several menu items containing the various functionality for Performance Manager. Access to the items is controlled by system-wide permissions, so chances are you won't see all the items listed unless you're an administrator for the system.

- [My Folder](#). This is the one item that all users have. The pages under this area contain employee profile information and provide easy access to appraisals, checklists, feedback, and other items saved to your profile.

Employee search

The **Employee Search** field in the navigation bar provides a way for both managers and administrators to quickly locate and view employees. The field always appears in the navigation bar no matter which page you are currently viewing, and automatically begins displaying search results once three (3) characters have been entered.

Searches are performed against employee names (first and last) as well as employee IDs. Clicking an entry from the list of results opens the *Tasks* page from the profile of the selected employee.

If your entered search criteria returns more than 10 matches, or you're looking for a terminated employee that does not appear in the drop-down list, the **Additional Results** link at the bottom of the list opens a new results page that lists all employees matching your criteria. This page includes an option to *Include Inactive Users* that, you guessed it, shows any inactive user that matches your search.

Help menu

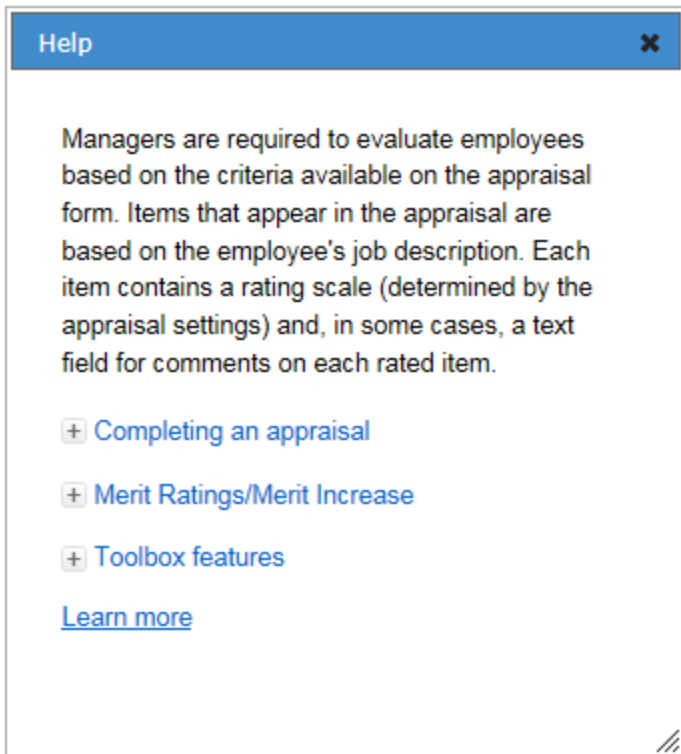

The Help menu in the navigation bar provides quick access to pages found in the online help system. Clicking any of the available links launches the online help system in a new browser window or tab and displays the topic for the selected option.

- [Help](#). Opens the help system to the home page, from which you can perform a search for topics, download user guides, or browse the available content.
- [Release Notes](#). Opens the help system to the Release Notes topic, which lists feature enhancements and bug fixes we've delivered over the given time periods.
- [Support](#). Takes you to the HealthcareSource Community Support portal, where you can search our knowledgebase of articles and submit support tickets.

Inline help

Inline help was created as a way to provide targeted bits of information that assist you in performing necessary tasks or functions within Performance Manager without having to dig through pages of information in online or printed user guides. Inline help delivers condensed chunks of user assistance that only relate to the page currently being viewed so you get the help you need now.

Clicking the  icon next to the breadcrumbs in the navigation bar opens a pop-up window within Performance Manager itself - not a new browser window or tab - so you can view necessary information about features or procedures without having to switch back and forth between multiple windows. Viewing assistance information in the same window as the feature you're trying to use makes it easier to get past those sticking points.

Another great thing about these inline help windows is that you can move them around the page and still interact with Performance Manager in the background. Open up an inline help window so you can see the steps necessary to complete your task, and click along in Performance Manager as you walk through the procedure. You can also resize the inline help window so it's never in the way.

Finally, if you're feeling particularly curious, clicking the **Learn More** link in the inline help window opens the full online help system for Performance Manager where you can view more detailed information about the feature(s) in question and all other areas of the system.

User menu

The user menu provides access to several settings pages that control security for your account and how certain features in Performance Manager operate. There's also a link for logging out of the system completely.

Selecting the *Settings* option opens the *Change Password* page by default. Additional pages can be viewed by selecting an option from the **Settings** drop-down list.

Settings: ▾

Change Password

Need to update your password? You're in the right spot. This page has the typical fields necessary for creating a new password for your account.

Make sure to review the rules listed when entering a new password, and definitely don't forget to click **Save** when you're done.

***Note:** Recovering a forgotten password (or username) is handled using [a different process](#) available on the system's Login page.*

Change Security Questions

Another page to help beef up your account security. These security questions help you retrieve forgotten usernames and/or passwords should you ever forget and can't log into the system.

Each of the three questions uses a drop-down list of pre-set questions. Select one, provide an answer, and move on to the next.

Finished with picking and answering the questions? Click **Save**. All done.

Enable Appraisal Auto Save

Don't you just hate it when you're working on something and your computer decides it's time to freeze up on you and you lose the last hour or so of work? Who has time for that?

Fear not. Check the **Enable Auto Save** option on this page, and your appraisals will automatically save as you're working on them. So even if your computer takes a nap, you won't lose all your work.

Enter Email Address

People move all the time, so constantly need to update their mailing address. Well, same thing goes for email addresses. You probably don't change your email that often, but if you ever do, this page lets you update both your work and home (personal) email address.

Tasks

Performance Manager simplifies the employee performance management process by automating the workflow and content for performance appraisals, job descriptions, skills, goals, succession planning, and performance reporting. These automated processes are driven by specific tasks assigned to employees.

The *Tasks* page (found under the **My Folder** drop-down menu) lists all the tasks that have been assigned to you in Performance Manager. It provides a searchable, filterable, sortable table that makes it easy to browse, locate, and complete your various tasks and assignments.

The screenshot shows the 'My Task List' interface for Angela Ludwig. The table below represents the data shown in the screenshot:

Type	Task	Employee Name	Due Date	Department/Position Name
License/Certification Reminder	Expiring: CCP	Angela Ludwig	9/23/2016	Nurse Manager, Nursing
Self Appraisal	Self Appraisal	Angela Ludwig	10/26/2016	Nurse Manager, Nursing
Review Job Description	Sign Job Description	Angela Ludwig	11/1/2016	Nurse Manager, Nursing
Appraisal: Not Started	2016 Performance Review	Jennifer Morse	11/25/2016	Nurse, Nursing
Appraisal: Not Started	2016 Performance Review	Thomas Joseph	11/25/2016	Nurse, Nursing
Appraisal: Not Started	2016 Performance Review	William Turner	11/25/2016	Nurse, Nursing

Most features of Performance Manager have associated tasks so employees know when they are required to complete work in the system. Notifications are also sent when tasks are assigned, so users don't need to continually log in to check for new assignments.

About the Tasks page

The *Tasks* page under **My Folder** displays a list of all the tasks you have been assigned. This table provides a way to easily locate and complete necessary tasks.

The screenshot shows the 'My Task List' for Angela Ludwig. The table contains the following data:

Type	Task	Employee Name	Due Date	Department/Position Name
License/Certification Reminder	Expiring: CCP	Angela Ludwig	9/23/2016	Nurse Manager, Nursing
Self Appraisal	Self Appraisal	Angela Ludwig	10/26/2016	Nurse Manager, Nursing
Review Job Description	Sign Job Description	Angela Ludwig	11/1/2016	Nurse Manager, Nursing
Appraisal: Not Started	2016 Performance Review	Jennifer Morse	11/25/2016	Nurse, Nursing
Appraisal: Not Started	2016 Performance Review	Thomas Joseph	11/25/2016	Nurse, Nursing
Appraisal: Not Started	2016 Performance Review	William Turner	11/25/2016	Nurse, Nursing

The interface provides information at a glance, and several ways to filter the Tasks table in order to locate specific items.

Employee Profile header

The Employee Profile header displays key information and provides quick links to take action on the listed items. A color-coding system for items delivers additional quick-view indicators so it's easy to see when it's time to review and update profile information.

The Employee Profile header for Angela Ludwig includes the following information and action tiles:

- Employee and Position Information:** Angela Ludwig, Nurse Manager, Nursing at General Hospital.
- Licenses and Certifications:** 3 items (Red background).
- Alerts:** 7 items (Orange background).
- Learning Opportunities:** (Blue background).
- Learning Assignments:** 7 items (Blue background).

Available areas in this header include:

- **Employee and Position information.** This area displays the employee name and position. Scroll arrows are available when an employee has multiple positions.
- **Licenses and Certifications.** This tile shows how many Licenses and Certifications reside in the employee's profile. A green background indicates everything is up-to-date; red background means there's items that have a renewal date upcoming or past due. Clicking the tile opens a table view that lists items under the header.
- **Learning information.** Available to clients with integrated NetLearning functionality, these areas provide access to NetLearning widgets for enrolled and available courses and classes. The Learning Assignments tile also displays the number of current assignments for the employee.

- **Task Alerts.** Displays the number of overdue tasks in the task list. Clicking this tile in the header opens a new page that lists the overdue tasks.

Filters and Search

The new *Taskpage* lists available filters in their own area to the left of the Tasks table. Filters include options for **Task Type** and **Due Date**.

Filters

Task Types

<input type="checkbox"/> 360: Facilitator Setup	7
<input type="checkbox"/> 360: Review	1
<input type="checkbox"/> Multi-Rater Appraisal	4
<input type="checkbox"/> Performance Goals	16
<input type="checkbox"/> Review Job Description	2

Due Date

<input type="checkbox"/> Beyond 90 Days	242
<input type="checkbox"/> Past Due	358

Managers also have access to an **Employee Status** filter that allows them to view tasks for inactive employees.

The items listed in each set of filters displays a number that indicates how many tasks match that specific filter. Clicking the checkbox next to an item filters the results shown in the table.

Right above the table is a **Search** field that allows you to search for specific tasks in the list. This field is a type-ahead field, so the table automatically begins to filter down with each character entered into the field. This field searches across numerous fields for tasks.

My Task List

Search...

Tasks table

Tasks are opened by clicking anywhere in their row. Tasks with associated sub-tasks display an arrow that, when clicked, expands the row to display the related sub-tasks.

	Type	Task	Employee Name	Due Date	Department/Position Name

Previous Next

Note: Only managers have access to this **Actions** menu.

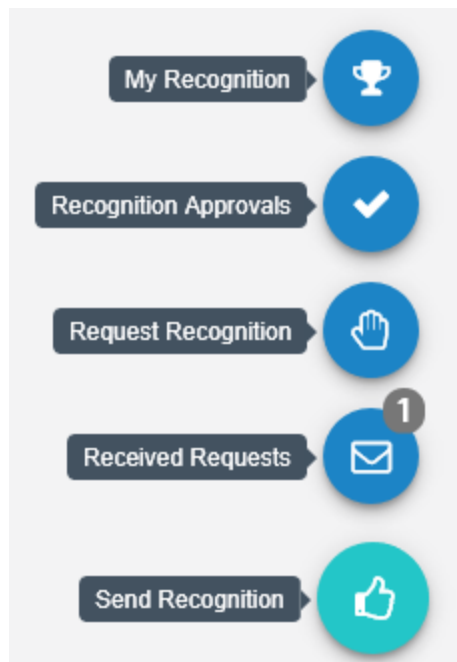

Recognition and Remarks

[Recognition and Remarks](#) is a commenting system that allows employees to send input to other employees about a recent exchange or behavioral observation at any time - not just when requested or during annual review periods. Its feedback form provides fields for selecting employees, associating specific values, and general comments for feedback.

Hovering your cursor over the **Recognition and Remarks** icon in the lower-right corner of the page displays additional feedback options, including:

- **My Recognition.** Displays all of your received recognition.
- **Recognition Approvals.** For managers only; displays a list of recognition sent to your employees anonymously.
- **Request Recognition.** Allows you to send a request for input from specific employees.
- **Received Requests.** Lists any requests for input you have received from colleagues.
- **Send Recognition.** Opens the form used to send recognition to a colleague.

Note: Depending on your system's settings, the **Employee Journal** may also be included with these feedback options.

Employee Journal

The [Employee Journal](#) is a quick and easy way to keep your own written record of events and accomplishments that

happen throughout the year. Using the journal allows you to quickly jot down a summary of events and activities, then reference them just as quickly whenever you need. Keep track of your training seminars, conference attendance, or any quick activities you want to remember, all within your own personal profile.

The **Employee Journal** icon is found in the lower-right corner of the *Tasks* page.

Note: Depending on your system's settings, the **Employee Journal** may either be grouped in with the **Recognition and Remarks** feedback options, or displayed independently.

Completing tasks

The *Tasks* page in Performance Manager provides an way to quickly locate and complete necessary tasks.

1. From the *Tasks* page, locate the desired task from the table.
2. Click anywhere in the task's row. This opens the page necessary to complete the task.

The type of page that displays after clicking a task depends on the type of task selected. After completing the necessary actions for the task, it is marked as *Complete* and removed from your task list.

Employees

The **Employees** area in Performance Manager provides managers with quick access to information regarding their employees' professional development. This includes features such as goals, checklists, and learning. The information gleaned within these pages enables you to make data-driven decisions about how certain employees have been performing, and continue guiding them on the best path to success by adding and assigning new development goals as needed.

The available pages under the **Employees** tab include:

- [Employee List](#). Lists employees you can access, such as direct reports. Provides links to view employee profile pages.
- [Validate](#). Lists all checklists for employees that you can access and modify.
- [Development](#). Provides views of available development goals, development plans, and assessments that can be assigned to employees.
- [Performance Goals](#). Provides a way to add new goals and assign goals to multiple employees. Lists available performance goals, and also tracks and evaluates employee performance across the organization.

Employee List

The *Employee List* page under **Employees** provides managers with quick and easy access to the profile pages of their employees. Only managers and system administrators can access the *Employee List* page.

Home / Bill Parker's Direct Reports

Search... Direct reports All reports [Compare Employees](#)

Thomas Joseph*	View ▾ Add ▾	
Jennifer Morse*	View ▾ Add ▾	
William Turner*	View ▾ Add ▾	

« < 1 > » Page size: 10 ▾
Displaying items 1 - 4 of 4

The table on the page displays all of your direct reports, as well as any of their direct reports as well. A plus sign icon (+) next to an employee indicates they have direct reports. Clicking this icon reloads the table to display all the direct reports for the selected employee.

A search field is available that provides a partial-word search on employee names. The table is automatically filtered based on each character that's entered into the search field. Additional options provide the ability to display only **Direct reports**, or show **All reports** (your direct reports AND their direct reports) listed together.

Employee File

Each employee in the row has an **Employee File** column, containing two drop-down menus:

- **View.** This split button provides two ways to view the available pages in the employees folder. Clicking **View** opens the employee's *Performance Vitals* page, while the down arrow opens a list other pages found in the employee's profile.
- **Add.** This menu provides a way to quickly add new items to an employee's profile without having to first visit that specific page. For example, selecting [Feedback](#) from the menu opens a blank feedback form. When completed, it is added to the employee's profile.

Settings

The Settings column contains two action buttons:

- **Account locking** ( ). This button toggles between locking and unlocking an employee's account. Employees cannot log into Performance Manager with a locked account.
- **Refuse to sign** ( ). This allows you to toggle the employee's refuse to sign privilege.

Validate

The *Validate* page under **Employees** provides a way for managers to view all checklists assign to employees that they can access. The table displays the name of the checklist and assigned employee, as well as a percentage complete for the individual checklists.

annual

Task	Employee	Employee Number	Form Name	%
Annual Checklist	Lewis, Margaret	1012	101: Secretary (Primary)	0%
Annual Checklist	White, Laurel	1016	100: Scheduler (Primary)	0%
Annual Competency Checklist	McGonigle, Elsie	1045	134: Recruitment Generalist (Primary)	50%
Annual Competency Checklist	Lapointe, Kevin	1034	123: Chaplain (Primary)	0%

Selecting a checklist from the table opens that [checklist form](#) where you can then make any necessary edits.

Job Descriptions

Job descriptions in Performance Manager are detailed descriptions of positions at your organization. They typically include such information as duties and expectations for the job.

Every employee in Performance Manager is assigned to at least one job description, though it is also possible to be assigned to multiple job descriptions if necessary. Job descriptions are reviewed and signed off by both the employee and their manager. PDF versions of approved job descriptions are saved to employee profiles.

Managers can view job descriptions for employees using the **Job Description** area from the navigation bar.

The screenshot shows the 'Job Descriptions' interface. On the left, there are filter sections: 'Facilities/Departments/Positions' with input fields for Facilities, Departments, and Positions; 'My Team's Descriptions' with checkboxes for 'My Team' (3) and 'Not My Team' (2); and 'Critical Positions' with checkboxes for 'Critical' and 'Non Critical' (5). The main area displays a table of job descriptions with the search term 'nurse' entered in the search bar.

Status	Job	Department	Facility	Last Published	Weight	Employees
Published	Clinical Nurse Manager (200)	Nursing (1000)	Healthcaresource (201)	5/28/2009	0%	5
In Progress	Nurse Aide (203)	Nursing (1000)	Healthcaresource (201)		0%	2
In Progress	Nurse Recruit/Retention Spec (137)	Human Resource (444)	Healthcaresource (201)		0%	1
Published	Oncology Nurse (213)	Oncology (2222)	Healthcaresource (201)	4/5/2012	0%	2
Published	OR Nurse Assistant (217)	Operating Room (3333)	Healthcaresource (201)	3/7/2012	0%	2

Navigation: < < 1 > > Page size: 25 Displaying items 1 - 5 of 5

Employees are able to view their own job description from the [Job Description](#) page under **My Folder**. The table on this page lists all the job descriptions signed off by the employee and the date they were approved. Clicking the title of a job description displays its detailed description on a new page.

The screenshot shows the 'Job Description' page for an employee. The breadcrumb trail is 'HCS Nonintegration (STAGE DATA) / Job Descriptions - Brian Abernathy'. The page includes a search bar and a table of job descriptions signed off by the employee.

Job Title	Signed On
Scheduler	6/26/2008
Administrative Services Coordinator	6/15/2007

Navigation: < < 1 > > Page size: 10 Displaying items 1 - 2 of 2

Only system administrators are able to manage positions and their related job descriptions, templates used to create job descriptions, and special forms used to populate job descriptions. In other words, if you need to [draft a new job description](#), or [edit an existing one](#), you'll need to work with your local administrators to set things up the way you need.

Reviewing a Job Description

Employees are required to review and sign off on all job descriptions they are assigned to in Performance Manager. Any time a new job description is assigned to an employee, they receive a task to review and approve that job description.

To review and approve a job description:

1. Click anywhere within the **Job Description** task, in the table on the *Tasks* page under **My Folder**.

The screenshot shows a 'My Task List' interface. At the top right is an 'Actions' dropdown menu. Below it is a search bar with the text 'Search...' and a magnifying glass icon. The main part of the interface is a table with the following columns: Type, Task, Employee Name, Due Date, and Position/Department Name. There is a single row of data in the table. Below the table is a pagination control showing '1' and navigation arrows. On the right side of the table area, there is a 'Page size' dropdown set to '25' and the text 'Displaying Items 1 - 1 of 1'.

Type	Task	Employee Name	Due Date	Position/Department Name
Job Description: Review Routed	Review Job Description for Secretary (101) routed by Brian Abernathy	Mary Dalton	5/9/2018	Patient Coord-Treatment Plan'g, Patient Services

2. Scroll down to review all the information contained in the job description.
3. Click **Sign** button at the bottom to acknowledge your review of the job description.

Clicking **Sign** creates a read-only PDF file of the job description and places it in the employee electronic folder on the *Job Description* page.

Some employees may have the option to **Refuse to Sign** the job description based on their permissions. Refusing to sign a job description indicates that the employee has an issue with some information included in the description. Clicking **Refuse to Sign** allows the employee to send the job description back to their manager, with comments, for further review.

Performance Goals

Performance goals provide a way to track and evaluate employee performance across an organization. Corporate directives in the form of basic [pillars](#) are defined and subsequent goals for departments, facilities, and individual employees are aligned upwards.

Employees can view their performance goals on the *Goals* page under **My Folder**. Managers are able to view and assign goals to employees from the *Performance Goals* page under **Employees**.

Adding goals

Goals can be added by either a manager or an employee, depending on the options chosen when the appraisal is scheduled.

A **Performance Goals** task appears in the task list when you have been assigned a goal form to complete for the appraisal schedule. Clicking the link from the task list opens the *Performance Goals* page, where goals can be reviewed, added, and edited.

Goals can be created from scratch, or [copied from previous goal forms](#). This topic covers creating goals from scratch.

Adding goals - Manager

For managers entering goals for their employees, the process is the same except for two additional fields found in the *Add a goal* pop-up window.

These steps take place from the *Performance Goals* page.

1. Click **Add** option from the **Actions** menu above the *Goals* table. The *Add a goal* pop-up window opens.

2. Complete the fields in the *Add a goal* window as needed.
3. Click the **Add** button when complete. The pop-up window closes and the new goal now appears in the list.
4. Repeat steps 1 through 3 until all goals have been added to the table.

Once all the necessary goals have been added to the My Goals table, click the **Send to Employee** button under the table. The goals form is then sent to the employee for review.

Tip: Remember, if you are using weights for goals, the **Total Weight** for the goal form (shown in the upper right corner of the My Goals table) must equal 100%.

Copying goals

When adding goals, users have the option to create goals from scratch, or copy goals from previous goal forms.

Managers and employees can copy active, approved goals from previous goal forms. Only individual goals can be copied (no corporate goals).

Copying goals - Manager

These steps take place from the *Performance Goals* page.

1. Click the **Copy** button above Goals table. The *Select goals to copy* pop-up window opens.

Select Goals to Copy	
Employee:	
Sheila Hamilton	
Goal Form:	
Goal for TC#27830	
<input type="checkbox"/>	Goals
<input type="checkbox"/>	Goal1 Goal1 Aligned To: Growth Weight: 100% Due Date: 08/01/2012

Copy Goals Cancel

2. Select an **Employee** from the drop-down menu. This determines which goal forms are available to copy goals.
3. Select a **Goal Form** from the drop-down menu. A list of goals on the selected form loads in the table below.
4. From the list of goals, check the box next to each goal you wish to copy.
5. When a goal is selected, the **Weight** and **Due Date** field become editable. Make necessary edits to these fields.

<input type="checkbox"/>	Goals
<input type="checkbox"/>	Goal aligned to Performance Pillar <i>Aligned To:</i> Performance <i>Weight:</i> 0% <i>Due Date:</i> 12/31/2013
<input checked="" type="checkbox"/>	Goal aligned to Quality Pillar <i>Aligned To:</i> Quality <i>Weight:</i> <input type="text" value="0"/> <i>Due Date:</i> <input type="text" value="12/31/2013"/>

6. Click the **Copy Goals** button at the bottom of the window when finished.

Clicking **Copy Goals** adds the selected goals to the goal form and closes the pop-up window. Additional goals can be created and/or copied to the goal form at this point.

Distributing goals

When creating new goals, the *Add a goal* pop-up window provides the option for managers to **Add and Distribute** the new goal to additional employees. Clicking this button opens a new *Distribute Goal* pop-up window where the manager can select individual employees and copy the goal to their forms.

The screenshot shows two pop-up windows. The left window, titled "Add a goal", contains a form for creating a goal. The "Name" field is "Provide learning assistance to residents". The "Description" field contains: "Employees must log a minimum of 2 hours per month for coaching/training of residents. This can include: Round reviews, Hands-on instructions, Theory discussions". The "Align To" dropdown is set to "People". The "Weight" is 0.00 and the "Due Date" is 9/25/2015. The "Manager Notes" field contains: "Sharing knowledge is vital for the overall success of the organization." At the bottom right, the "Add and Distribute" button is circled in green with an arrow pointing to the right window.

The right window, titled "Distribute Goal", displays the goal details and a list of employees to be selected. The goal name is "Provide learning assistance to residents" with a due date of 9/25/2015 and weight of 0%. The "Aligned To" is set to "People". The employee list is as follows:

Employee	Position	Department
<input type="checkbox"/>	7326 User	Business Systems Analyst
<input checked="" type="checkbox"/>	Andy Long	Secretary
<input type="checkbox"/>	Anne Jones	Secretary/Rehab Aide
<input type="checkbox"/>	Christian Colwell	Administrative Systems Analyst
<input checked="" type="checkbox"/>	Joyce Joyce	Admitting Coordinator
<input type="checkbox"/>	Laurel White	Director of Administration
<input type="checkbox"/>	Laurel White	Scheduler
<input type="checkbox"/>	Manager 52409 Read Only	Administrative Services Coordinator
<input type="checkbox"/>	Manager 53052 Read Only	Administrative Services Coordinator
<input type="checkbox"/>	Margaret Lewis	Secretary
<input type="checkbox"/>	Meagan Lynch	Secretary II
<input type="checkbox"/>	Pankaj Kukkar	Administrative Services Coordinator
<input type="checkbox"/>	Paul Lynch	Director of Administration
<input type="checkbox"/>	RoutingUser 67567	S422Position
<input type="checkbox"/>	TestCase 15766	Administrative Systems Analyst

This **Distribute** option is also available from the main Goals form. Clicking this icon opens the same *Distribute Goal* pop-up window for selecting additional employees to assign the selected goal.

Note: Employees that do not have active Goal forms cannot be selected in the Distribute Goals pop-up window. Their rows are disabled. Disabled employees can be hidden from the table using the **Hide Disabled** link in the top of the window.

Reviewing and approving goals

After an employee submits their goal form, it is sent to their manager for review and approval. A **Performance Goals** task appears in the manager's task list when they have been assigned a goals form to review for an employee.

Clicking the link from the task list opens the *Performance Goals* page, where goals can be reviewed, added, and edited.

The manager can make any edits they deem necessary to the employee's goal form. This includes adding, removing, and editing goals.

Tip: Remember, if you are using weights for goals, the **Total Weight** for the goal form (shown in the upper right corner of the My Goals table) must equal 100%.

Managers also have the option to reject an employee's submitted goals. When a manager rejects a goal form, it is sent back to the employee so they can make edits and re-submit the form.

When finished reviewing and revising the goals form, clicking the **Approve** button under the Individual Goals for [Employee name] table finalizes the process. The page reloads and displays the Tasks list, which no longer shows the task to review employee goals.

Assessing goals

Employee goals are evaluated and rated during scheduled assessments by managers. When managers complete assessment forms, a **Goals** section is included where they use the selected assessment scale to rate the employee against their defined goals.

No special steps are required to assess goals; simply select the ratings for the defined goals in the **Goals** section of the assessment form.

Goals - Where We're Going

Review the following goals and select "YES" if at least one goal is met or "NO" if at least one goal is not met. Write comments as deemed appropriate.

Goals are created and monitored in the Goals section of Performance Manager. A minimum of one Individual and one Departmental or one Organizational goal are required each year, per Policy K-37. Every goal must be assigned to a Strategic Plan Pillar.

Employee has met at least one Individual Goal. 

score: N/A

Job Specifications

Updating goals

Updating a goal consists of either adding notes (both managers and employees) and/or changing the **Percent Complete** field for a goal (managers only).

Adding notes

Goal notes are added to individual goals from a goal form. Managers are able to add notes to employee goals, and employees can add notes to their own goals and respond to any manager notes.

An employee can reach their goal form by clicking the **Goals** link under the **My Folder** area in Performance Manager.

These steps take place from the goals form found on the *Goals* page.

1. From the goal form, click the **Show Notes** link for the goal where you want to add a note. This expands the row and displays any previous notes that may have been left and provides a text box to add a new note.
2. Type in text for the new note.

Goals		Total Weight: 100.00%	
		Actions	
Earn certificate Aligned To: Growth Hide Notes		Due: 6/30/2015 Percent Complete: 100% Weight: 33.34%	   
<input type="text" value="Enter new note"/> 0 / 1000		<input type="button" value="Add Note"/>	
Several certificates are required by Brian Abernathy on 06/15/2015		<input type="button" value="Remove"/>	

3. Click the **Add Note** link under the text box when finished with the note.

The row reloads to show the new note has been added to the goal.

Updating Percent Complete

For a manager to update the **Percent Complete** field:

1. From the *Employees* page, click the **Goals** link in the table for the desired employee. This opens the employee page.
2. Click the link under the **Performance Goals** section. This opens the employee's *Performance Goals* page.
3. Locate the goal you wish to update and click the **Edit** icon. This opens the *Edit a Goal* pop-up window.

Edit a goal ✕

Name: Corporate Financial Goal

Description:

Align To: Financial

Weight: 0.00 %

Due Date: 7/31/2012

Percent Complete:

Manager Notes:
83/255

4. Make the necessary changes to the **Percent Complete** field.

5. Add any **Manager Notes**, if necessary.
6. Click the **Save** icon when finished making changes.

Clicking **Save** updates the goal. Employees are able to view the updates made to their goals.

More about Performance Goals

Notes

Notes can be added to individual goals. Both managers and employees can add notes to a goal; only the person who created the note can delete it.

Notes can be used to keep track of important details regarding the goal, provide status information when updating completion percentages, or simply correspondence between an employee and a manager.

Notes are viewed by clicking the **Show Notes** link in the goal. The number of notes a goal has is indicated by the number in parenthesis next to the **Show Notes** link.

<p> by Brian's Abernathy Make sure to sign up for relevant and enriching learning experiences!</p> <p style="text-align: right;">3/6/2017 at 2:19 PM ✕</p>	

There are two types of notes that can be added to a goal:

- **Manager notes.** These are notes that are added to a goal when it is initially created, or when a manager returns to a goal form and edits an existing goal. Manager notes are not viewable by employees.
- **Goal notes.** Goal notes are notes added to individual goals that are viewable by anyone that has access to the employee goal form. Both managers and employees can create goal notes; only the person who created the goal note can delete it.

Notifications

In order to keep both employees and managers up to date with the progress of their goals in the system, automatic notifications are sent when certain actions take place.

- **Manager approval of goals.** When a manager approves an employee’s goal form, the employee is sent an email notification.
- **Manager rejection of goals.** Employees also receive a notification if a manager rejects their submitted goal form. This isn’t a notification of rejection; rather, when a manager rejects a goal form, the employee is re-assigned the task to enter their goals. Therefore, the employee receives a notification that they must enter their goals.

Weighting

The Goals module provides a weighting system for individual goals. This allows users to determine which goals hold more importance than others, or ones that may require additional effort to complete.

Add a goal
×

* Name:

Description:

B *I* U

Sign up for and complete no fewer than five (5) continuing education opportunities. These may include in-person classroom academics, e-learning courses, and professional conferences.

182 / 2000

* Align To:

Weight: ▲ ▼

* Due Date:

Percent Complete: ▲ ▼

Manager Notes:

77 / 1000

Individual goals can be assigned a weight when they are added to the system. When creating a set of goals for a user, the sum total of weight for all the combined goals must equal 100%. Users will not be able to submit their goals for approval unless the total weight equals 100%.

The **Apply Weights Equally** button allows you to quickly distribute weight evenly across the available individual goals.

It is not necessary to add weights to goals.

The weighting feature is an option for the Goals module. When the option is not activated, the “Weight” column does not appear in pop-up windows or goals tables. This option, labeled **Show weights on Job Descriptions and Goals**, can be found on the *Settings* page under the **Admin** area in the **Choose Appraisal Options** section.

Development Goals

Development goals are used by managers to encourage employees to improve and meet specific performance targets. These goals appear as tasks for employees to complete once the goal has been met.

Development goals can be found on the *Goals* page under **My Folder**. Updates to goals can be made by both employees and managers throughout the year.

Development Goals workflow

The basic workflow for development goals is as follows:

1. A manager creates a development goal for an employee.
2. The employee receives a task and completes the development goal.
3. The manager reviews the employee's completion of the goal.

About the Development Goal form

The Development Goal form contains several fields for identifying and tracking the assigned goal.

Add Goal

Created By	
Date Created	3/7/2017
Employee	MANNY MANAGER
*Type	Select Goal Type ▼
*Title	<input type="text"/>
Details	<div style="border: 1px solid #ccc; height: 60px;"></div>
Measure	<div style="border: 1px solid #ccc; height: 60px;"></div>
*Due Date	<input type="text"/> 

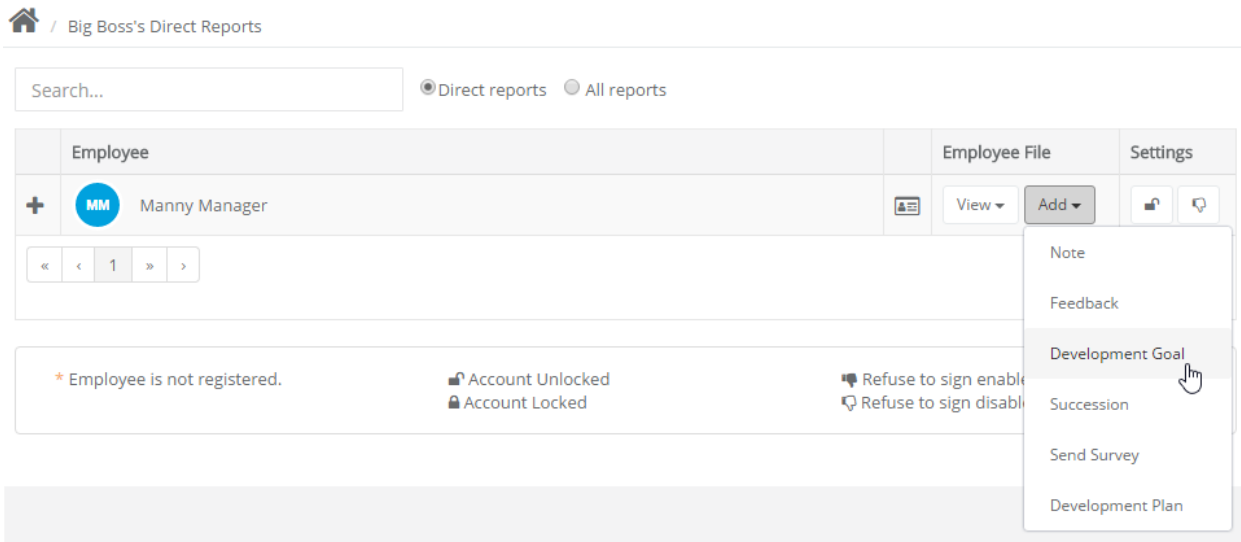

* Indicates Required Field

- **Created By.** The manager that created the goal for the employee.
- **Date Created.** The date the goal was added to the system.
- **Employee.** The employee assigned to the goal.
- **Type.** Drop-down menu with three selections for goal type:
 - **Individual.** These goals relate directly to the employee.
 - **Departmental.** These goals are related to goals set for the employee's specific department.
 - **Organizational.** These goals relate to the goals set for the overall organization. Selecting this option changes the **Title** field from a generic text field to a drop-down list that contains all available organizational goals.
- **Title.** Title of the goal. For **Individual** and **Departmental** goals, this field is a text box. However, when creating an **Organizational** goal, this becomes a drop-down field that lists all the available organizational goals, from which a selection must be made.
- **Details.** Details about the goal, which can include such information as why the goal has been created and what is hoped to be achieved.
- **Measure.** This details how success in meeting the goal is determined.
- **Due Date.** Sets the date by which the employee must complete the goal. It also serves as the due date for the task that is created for the employee.

Adding Development Goals

Managers can create development goals for employees at any time. There's no limit to the number of development goals that can be assigned to an employee.

These steps take place from the *Employee List* page under the **Employees** area.

1. Locate the desired employee from the list and click **Add**, from the *Employee File* column. This displays several options in a drop-down menu.
2. Click the **Development Goal** option in the drop-down menu. The *Add Goal* page opens.
3. Complete the form as necessary.
4. When finished filling out the form, click the **Save and Send** button to send the development goal task to the employee for completion.

Clicking the **Save** button saves a draft of the goal and places the task in the manager's task list for completion at a later date.

Once the Save and Send button is selected, managers are only able to modify the **Due Date** for the goal.

Reviewing Development Goals

After an employee has completed a development goal task, the manager is assigned a task to review and finalize the task.

These steps take place from the *Tasks* page under **My Folder**.

1. Click the link for the desired development goal task in the *Tasks* table. This opens the *Goal* page for the task.
2. Review the information left by the employee in the **Comments** and **Status** areas of the goal form.
3. In the **Manager Evaluation** area of the form, select a **Status** for the goal.

Manager Evaluation	
Status	<input checked="" type="radio"/> Met <input type="radio"/> Partially Met <input type="radio"/> Not Met
Manager Comments	<div style="border: 1px solid #ccc; padding: 5px;"> He did a great job. </div>

4. Enter any additional **Manager Comments** as necessary.
5. Click the **Sign** button.

Signature

I understand that my electronic signature carries the same legal weight and authority as my written signature.

Name **Brian Abernathy** Date **01/08/2015**

Clicking the **Sign** button completes the task. A PDF for the development goal is created and added to the employee's profile.

If the manager disagrees with the employee's evaluation of the task, clicking the **Send Back to Employee** button re-creates the goal task for the employee.

Refuse to Sign

A **Refuse to Sign** option is available that provides employees with the ability to refuse to sign off on developmental goals added by their manager.

When this option is enabled for an employee, an additional **Refuse to Sign** button is available at the bottom of the goal form when performing their **Developmental Goal** task. Clicking this button sends the feedback to the manager without signing off.

Employees can still leave **Comments** even if they refuse to sign off on the goal. Any text entered into the **Comments** field is displayed to the manager.

When an employee refuses to sign off on feedback, the form is sent back to their manager as a **Refused to Sign: Goal** task. Managers are required to review the goal form and sign off to complete the task. The Signature section of the form notes that the employee selected the **Refuse to Sign** option for the goal, and displays any comments left by the employee.

Managers have the option to **Sign** the goal form, which completes the task, or **Send Back to Employee** for further review and comment.

Appraisals

Appraisals in Performance Manager provide the ability for managers and employees to rate workplace performances based on the job description forms associated with their position. These appraisals are conducted on varying intervals depending on your company's own policy.

Appraisals provide a measurement of employee performance based on the benchmark criteria pre-established for their job. This differs from the 360 Review, which focuses more on the skills and contributions an employee provides to the workplace and their co-workers.

Manager appraisals are conducted to rate and comment on each of their individual employee's performance throughout the duration of the period. Employees conduct self appraisals and multi-rater appraisals to share their own beliefs and estimations on how their own— or their co-workers' — accomplishments stack up to what was expected of them throughout the evaluation period.

Appraisal types

There are three types of appraisals in Performance Manager:

- **Manager appraisal.** This is the basic employee appraisal form, based on a job description. Managers complete this evaluation form for all their direct-report employees.
- **Self appraisal.** Self appraisals are completed by employees in reference to their own performance. Self appraisals are reviewed with the employee's manager.
- **Multi-rater appraisal.** As part of 360-degree feedback in Performance Manager, multi-rater appraisals are completed by selected employees. Managers select which users conduct appraisals about their employees.

Completing a manager appraisal

As a manager, you are required to complete a **Manager Appraisal** for each of your employees. This allows you to rate and comment on employee performance throughout the appraisal period.

A **Complete Appraisal** task appears in your tasks list for each employee that requires an appraisal. There is often a due date listed by which you need to complete the appraisal.

These steps take place from the *Tasks* page under **My Folder**.

1. In the Tasks table, locate and select the **Complete Appraisal** task. This opens the *Appraisal* type selection page.
2. Select the *Complete Manager Appraisal* option and click **Continue** to open the appraisal form.

Select the appraisal action(s) you would like to take below:

- Complete Manager Appraisal** - Complete manager's appraisal of "Long, Emily "
Due Date: 10/4/2008
- Self-appraisal** - Assign self-appraisal task to "Long, Emily "
- Multi-rater Appraisal** - Assign multi-rater appraisal task of "Long, Emily " to someone else
- Reassign Appraisal** - Reassign the appraisal for "Long, Emily " to another user 

3. Review each item on the appraisal form and provide a rating based on your opinion of the employee's performance.

Note: If self and multi-rater appraisals have been performed for the employee, feedback from those users (ratings and comments) appear for each item on the appraisal form.

- Works cooperatively and collaboratively building a positive team spirited. 
 - Meets Needs Improvement N/A

Anonymous

Meets Needs Improvement N/A

Comments
meets [copy](#)

4. You may be able to provide notes on individual items in the form by clicking the notes icon (🗒️) for each item listed. This opens a large text field for you to enter additional comments on the appraisal item.

Note: If the notes area opens automatically when you select a rating for an item, it is required that you provide comments for that item.

5. Select a **Merit Increase** for the employee.

Merit Increase

0-10 = 0% increase
 10-20 = 2% increase
 20-30 = 3% increase

Note: When enabled, the system automatically recommends a merit increase based on the scores provided throughout the appraisal form. The recommended increase is highlighted, and managers may have the ability to override the recommendation.

- Provide any additional notes necessary in the **Appraisal Comments** area.
- Select a **Date Reviewed with employee**.

Date Reviewed with employee

- Click the **Save and Send** button when finished.

Clicking **Save and Send** finalizes the appraisal. Depending on your company process, appraisals are either be sent directly to the employee for review and signature, or routed to other managers for review first.

Assigning a multi-rater appraisal

Multi-rater appraisals allow fellow employees to rate themselves. Employees selected for multi-rater appraisals are able to provide ratings and comments on items, which are reviewed by managers.

Multi-rater appraisals are assigned to employees by their manager, from the *Tasks* page under **My Folder**.

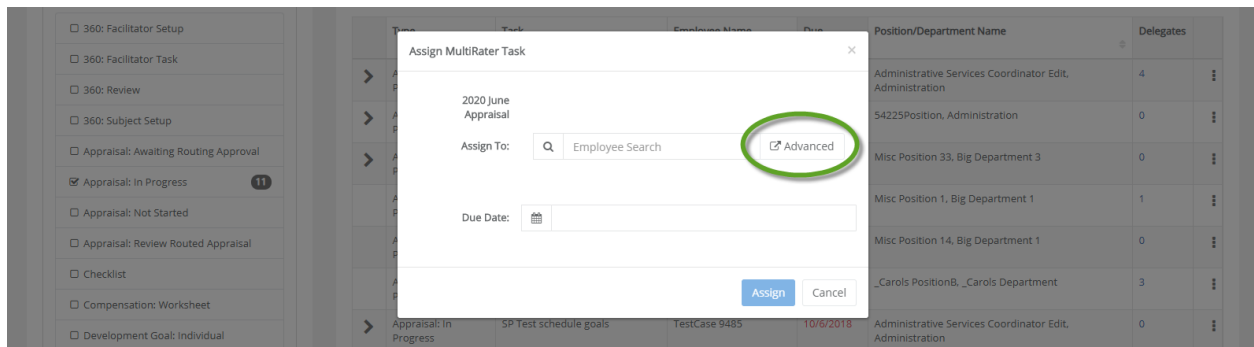

- Selecting **Send Multi-Raters** from a **Task Actions** menu displays the *Assign MultiRater Task* pop-up.

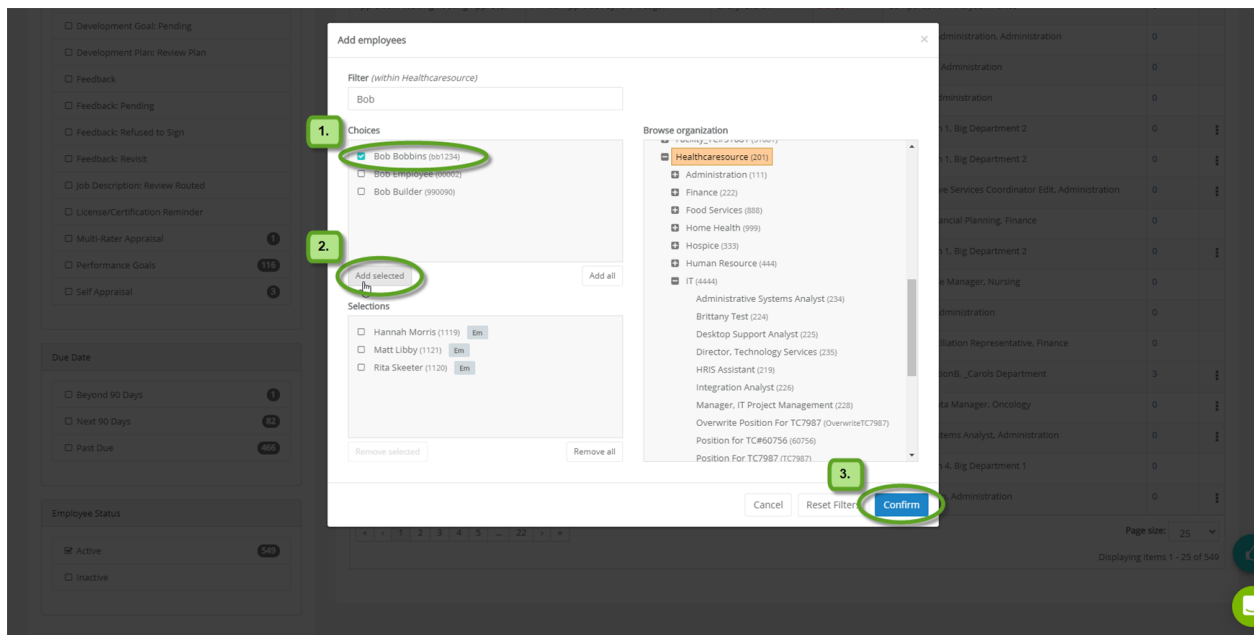

Appraisal Status	Adding Facility	User	Date	Position	Rating

- Type the desired employee names in the **Assign To:** field, or select **Advanced** to browse and add employees by

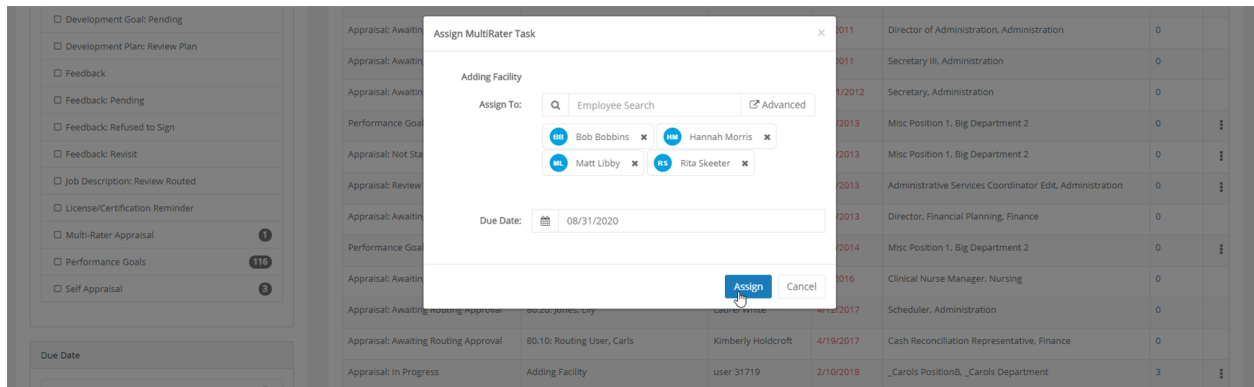

Organization and Department.

- When browsing for employees via the *Add Employees* page, selecting **+** expands an organization to show any departments underneath. Selecting one of these sub-departments displays any available employees to add in the *Choices* area.
- Find the desired employees within an organization or sub-department by entering a name in the **Filter** field. Any matches display in the *Choices* area.
- Selecting the **checkbox** beside their name(s) and clicking **Add Selected** adds them to the *Selections* area.

- Once you've added all the necessary employees, selecting **Confirm** displays the *Assign MultiRater Task* popup, with the employee names on display.

7. Enter a **Due Date** in the field.
8. Clicking the **Assign** button assigns the multi-rater appraisal to the chosen employees. Your *Tasks* page reloads, displaying a confirmation dialog in the upper-right corner of the page.
9. The employees can now complete the multi-rater appraisal task from their own individual *Tasks* pages.

Once the assigned employees finish their appraisals, the task details update indicating the subtasks are complete.

Completing a multi-rater appraisal

Multi-rater appraisals allow managers to request employees to rate other employees on their performance.

Responses are viewable by the manager that assigned the appraisal and the HR department. The employee for the appraisal is able to view the ratings and comments left by multi-raters, but are unable to view which employee left those comments unless a name is indicated in the comments themselves.

When you are assigned a multi-rater appraisal, a **MultiRater Appraisal** task appears in your tasks list. There is often a due date listed by which you need to complete the appraisal.

These steps take place from the *Tasks* page under **My Folder**.

1. In the Tasks table, locate and select the **MultRater Appraisal** task. This opens a confirmation page.

You have been asked to contribute your insight and perspective to the ongoing development of Rita Skeeter. Your insights are important to the Employee and to the Organization. Multirater Line1

Your name, comments, and scores will be visible by the employee.

Do you want to participate in this evaluation?

© 2006-2020 HealthcareSource HR, Inc. All Rights Reserved.

2. Click **Yes** on the confirmation page to continue to the appraisal form.

Note: Clicking **No** indicates that you wish to opt out of the multi-rater appraisal. You are taken back to the *Tasks* page, and the **MultRater Appraisal** task no longer appears in your task list.

3. Review each item on the appraisal form and provide a rating based on your opinion of the employee's performance.
4. You may provide notes on individual items in the form by clicking the notes icon (🗨️) for an item. This opens a large text field for you to enter additional comments on the appraisal item. However please note that in order for your comments to be saved, you must choose or enter an evaluation option.

Note: If the notes area opens automatically when you select a rating for an item, it is required that you provide comments for that item.

5. Provide any additional notes necessary in the **Appraisal Comments** area.
6. Click the **Save and Send** button when finished.

Clicking **Save and Send** finalizes the appraisal and sends the form to the employee's manager for review. You can no longer edit the appraisal once it's submitted.

Routing appraisals

Routing an appraisal provides additional users the opportunity to review and approve appraisal details either before or after the manager performs the appraisal with the employee.

Note: The routing feature must be turned on by your HealthcareSource Account Manager. Discuss your routing/approval workflow with your HealthcareSource Account Manager to receive recommendations on how the system can be set up.

Routing an appraisal before the employee review

When routing an appraisal before reviewing it with the employee, the manager is presented with a pop-up window after clicking the **Save and Send** button on the appraisal form. This pop-up prompts the manager to select which user the appraisal should be routed to for approval.

If routing is not required, the manager also has the option to choose *None – Complete Routing*, which sends the appraisal directly to the employee.

The routing user selected by the manager has the option to **Accept** or **Reject** the appraisal.

- If the routing user **Accepts** the appraisal, they have the option of routing the appraisal to another user by picking a name from the drop-down list. They can also select *None – Complete Routing* and send the appraisal back to the manager.

Once the appraisal has received all necessary approvals, the manager cannot make any changes.

- If the routing user **Rejects** the appraisal, they are required to make a comment as to why it was rejected. The rejected appraisal is returned to the manager for the necessary changes, and the routing process is repeated.

Once the appraisal is accepted, the manager conducts the meeting with the employee and sends it to the employee for signature. After the employee signs the appraisal, the process is complete. The appraisal will have the employee's signature, the manager's signature and the routing user's signature(s).

Routing an appraisal after the employee review

When routing an appraisal after reviewing with an employee, the manager is presented with a pop-up window after clicking the **Save and Send** button on the appraisal form. This pop-up prompts the manager to select which user the appraisal should be routed to for approval.

If routing is not required, the manager also has the option to choose *None – Complete Routing*, which sends the appraisal directly to the employee.

When a routing user is selected from the drop-down list, the employee is still the first to review the appraisal. Once the employee submits their appraisal, it is then sent to the routing user selected by the manager.

The routing user selected by the manager has the option to **Accept** or **Reject** the appraisal.

- If the routing user **Accepts** the appraisal, they have the option of routing the appraisal to another user by picking a name from the drop-down list. They can also select *None – Complete Routing* and send the appraisal back to the manager.

Once the appraisal has received all necessary approvals, the manager cannot make any changes. The approved appraisal appears in the employee's record as a PDF file.

- If the routing user **Rejects** the appraisal, they are required to make a comment as to why it was rejected. The rejected appraisal is returned to the manager for the necessary changes, and the routing process is repeated.

Assigning a self appraisal

Self appraisals allow employees the opportunity to evaluate themselves on their performance throughout the review period. They are able to provide ratings and comments on items, which is reviewed by their manager.

Self appraisals are assigned to employees by their manager, from the *Tasks* page under **My Folder**.

1. Selecting **Send Self-Appraisals** from the **Actions** menu at the top-right corner of *My Task List* displays the *Select Tasks* page.
2. Select the desired appraisal tasks to assign from the list.
3. Set a new due date for the self appraisal by using the **Change Due Date** field, if necessary. This field may be left blank if you don't want to change this.

6. Your *Tasks* page reloads, displaying a confirmation dialog in the upper-right corner of the page.

7. The selected *Tasks* employee can now complete the self-appraisal task from their own *Tasks* page.

After the employee completes their self appraisal, the task in the manager's *Task List* updates to show it is complete.

More about Appraisals

Reassigning Appraisals

Appraisal tasks can be reassigned to other users in the event the assigned user is unable to complete the appraisal due to being out of the office or other time constraints. Reassigning an appraisal creates a task for the selected user to complete the appraisal, and removes the task for the current user.

To reassign an appraisal, select the *Reassign Appraisal* option after clicking the desired appraisal task from the tasks list. A page opens that provides an area to search for and select a user for the reassigned appraisal task.

Rejecting Appraisals

At any point during the appraisal process (before a PDF document is generated), managers and routing users are able to reject appraisals. Rejecting an appraisal sends it back to a user (either the employee or the employee's manager) where it appears in their task list in order for them to make necessary changes.

Since rejecting an appraisal removes all existing signatures from the appraisal, it needs to be re-routed for approval.

To reject an appraisal, click the **Reject** button at the bottom of the appraisal form. You are required to add comments explaining why it was rejected so users can make necessary updates to the appraisal.

Routing Users

Appraisals can be assigned to routing users to gather additional review and feedback. Performance Manager has both **system-level routing users**, which are available to everyone in the system, and **personal routing users**, which only appear for the individual users that have defined their own set of routing users.

System-level routing users are defined by system administrators. Personal routing users are defined by individual users.

Personal routing users are defined on the *Personal Routing Users* page under the **My Folder** area. Users added to this list appear in drop-down menus when routing items.

Recognition and Remarks

Recognition and Remarks is a commenting system that allows employees to send input to other employees about a recent exchange or behavioral observation at any time - not just when requested or during annual review periods. This 24/7 approach to input allows people to respond immediately and honestly while everything is fresh on their mind so they're able to include specific details in their comments and help compile a more accurate view of employee performance.

Comments left for an employee can be associated with specific organizational and/or corporate values in order to provide even more context to the nature of the employee behaviors that inspired the unsolicited comments.

To help encourage employees to provide open and honest input regarding colleague activities, a feature setting provides an option to send input anonymously, which simply hides the name of the sender of the comments from the recipient.

Once the comments are sent, recipients are able to view the input left for them in Performance Manager. Recognition is saved in the employee profile, so both employees and managers are able to review the full history of received recognition.

Tip: If the [Employee Journal](#) is enabled, you can access your *Journal* page from its icon in the lower-right. Depending on your system's settings, it may either be grouped in with the **Recognition and Remarks** feedback options, or displayed independently.

Where can I find Recognition and Remarks?

Recognition and Remarks is located on the *Tasks* page as an icon in the bottom-right corner. Hovering your cursor over the icon expands the menu to show all the available options.

- [My Recognition](#). Displays all of your received recognition.
- [Recognition Approvals](#). For managers only; displays a list of recognition sent to your employees anonymously.
- [Request Recognition](#). Allows you to send a request for input from specific employees.
- [Received Requests](#). Lists any requests for input you have received from colleagues.
- [Send Recognition](#). Opens the form used to send recognition to a colleague.

Note: Available options in the menu are controlled by system settings and permissions, so you may not have access to all the listed features.

About the Recognition form

The Recognition and Remarks form provides fields for selecting employees, associating specific values, and general comments for feedback.

Note: Due to the highly configurable nature of the Recognition and Remarks feature, you may notice differences in some verbiage and screenshots shown here.

Send Recognition

Did you have a great experience with one of your employees or colleagues? Let them know!

- **Select an employee.** Search field for locating the employee for your feedback. This is a type-ahead field that automatically displays employee names that match after three characters have been entered.

Tip: See an **Advanced** button in your employee search field? That means you can [send recognition to multiple employees at once!](#)

- **Corporate values.** Drop-down list that allows you to make multiple selections for any organizational/corporate values to assign to the feedback.
- **Comments.** Text field for entering your comments for the employee.
- **Send anonymously.** This option allows you to [send your feedback anonymously](#), which simply hides name of the sender from the receiving employee. The recipient's manager must approve all anonymous feedback before it is shown to the employee.

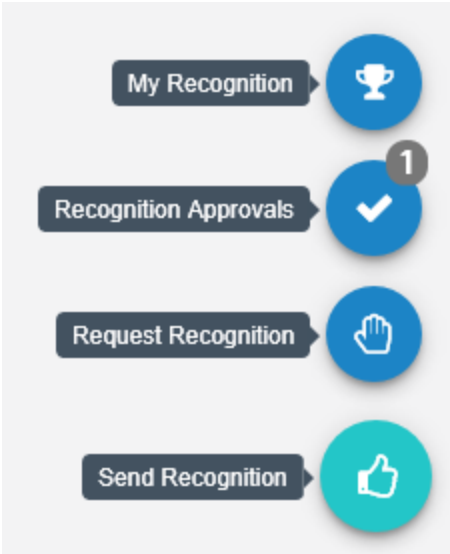

Anonymous Recognition

Recognition and Remarks includes an option to send input to a colleague anonymously. This simply hides the name of the sender from the recipient. Anonymous recognition helps promote open and honest feedback amongst employees who otherwise might be hesitant to leave either positive or constructive comments for a fellow employee.

Send anonymously

Sending feedback anonymously hides your identity from the recipient and their manager (system administrators can still see who sent feedback). The recipient's manager must approve the feedback before it is sent to the employee.

Anonymous recognition must be approved by the recipient's manager (who is also unable to view the name of the sender) before it can be viewed by the recipient. Managers receive a notification via email and in the icon menu on the *Tasks* page on the *Recognition Approvals* option.

Managers can either **Approve** or **Reject** the anonymous recognition.

×

Recognition Approvals

Please review the anonymously submitted Recognition(s). If approved, the Recognition will be sent to the recipient. The sender will not be notified that the Recognition was rejected.

Approving Recognition

When an employee receives anonymous recognition, their manager must first review the input and decide if they want to approve or reject it. Only approved input is sent to the recipient.

Managers receive a notification via email and in the icon menu on the *Tasks* page on the *Recognition Approvals* option.

Clicking the Recognition Approvals item opens a new window the details of the anonymous input. Each item has the option to **Approve** or **Reject** the feedback. Select an option and click **Done** to finalize the review.

Batch Recognition

Recognition and Remarks helps build a complete, accurate profile of employee performance by allowing colleagues to leave feedback at any time about specific observed behaviors. But what about those times when a group of people go above and beyond to ensure organizational success?

Batch recognition has you covered. This allows you to select multiple employees or an entire department, facility, even job position for your comments. This sends your input to everyone at once, saving you time as you deliver recognition to the group.

Sending batch recognition is easy too: when enabled, you'll notice an **Advanced** button in the employee search field of the *Send Recognition* pop-up window. This indicates you can select multiple employees for your input.

Select an employee

↗
Advanced

There's two ways to add multiple employees:

- **From the employee search field.** As you begin typing into the search field, a list of matching employees is displayed. Clicking on an employee adds them to the recognition. Then just begin typing the next employee's name to add, and select them from the list. Repeat until all the desired employees have been added.

If you have new items to view, those are shown separately. Clicking **Show All** displays all of the recognition items you have received to date.

You can also access a listing of all your recognition items on the *Feedback* page under **My Folder**. The **Timeline** tab on this page shows the same list of received items.

Additionally, the **Show Sent** button displays a list of all the recognition you sent to other employees.

Checklists

Checklists provide a way to assess employees on basic skills that relate to their positions in your organization. Whereas Assessments and 360 Reviews are intended to evaluate an employee's attitude, workplace contributions, and professional achievements, checklists are provided for the purpose of measuring the employee's skill level and ability in performing specific tasks such as drawing blood or inserting an IV line. Simply put, checklists assess to what degree they *can* or *can not* successfully perform a task.

Lists of specific skills is created and assigned to individual positions in Performance Manager. A checklist schedule is created (by an administrator) that assigns a checklist task to managers. This task requires them to evaluate their employees on the skills for their competency checklist.

Employees can also be assigned self-assessment tasks for checklists, allowing them to evaluate themselves on the necessary skills, and share the assessment with their manager.

Checklists can contain multiple skills, but not all skills on a checklist need to be completed at the same time. Checklist items can be evaluated when possible, and the checklist saved for completion at a later date.

Once all items on a checklist have been completed, the entire checklist can be closed. Closed checklists are stored as a PDF in the employee profile, and the employee is then assigned a sign-off task.

Users with a **Validator** role are able to complete individual skills for an employee, along with the employee's manager, but only the manager is able to close the entire checklist and complete the task.

About the Checklists form

The form used for checklists contains fields for evaluating employees on specific skills.

The form itself is organized in groups of skills. Each group heading contains a number that indicates how many skills require validation under that heading. When all the skills have been completed for a group, the number becomes a green checkmark.

▼ Cardiovascular	4
Clinical	✓
▼ Pulmonary	✓

Required fields on the form are indicated with an asterisk (*) next to the field name.

Rating	Rating scale used to evaluate the employee's performance of the selected skill. Rating scales may differ from skill to skill depending on how they are set up for your organization.
Validation	Determines how the skill was evaluated.
Population	Determines the population that was used to evaluate the skill.
Assessment Date	The date the skill evaluation was performed.

Comments Text field for general comments about the employee's performance on the selected skill.

Completing skills

Skills are used to validate an employee's ability to perform skills necessary for their job positions. Checklists can contain many skills for evaluation, though not every skill needs to be evaluated at once.

Managers have the ability to [close a checklist](#) once all skills on a checklist have been completed.

Checklists can be completed by opening a Checklist task from the *Tasks* page, or by visiting the *Validate* page under **Employees** and selecting an employee to evaluate from the table.

Users in a Validator role are able to complete individual skills on a checklist (along with the employee's manager); however, only the manager is able to close the entire checklist and complete the task.

To complete a checklist once the checklist form is open:

1. Locate the desired skill to evaluate from the list in the form. Skill group headings can be expanded to display the skills themselves, and clicking these sub-items opens that skill.
2. Complete the skill evaluation form as necessary.
3. When finished with the form, click the **Complete This Item** button to finalize your evaluation of the employee for that skill.
4. Repeat steps 2 and 3 for other skills you wish to evaluate.

Clicking the **Complete This Item** button for individual skills marks selected skill as complete and closes it. While you can view closed skills, you are not able to make any further edits on a skill once it has been completed.

The **Save This Item** button saves your work on the current skill for completion at a later date.

Closing checklists

Managers complete checklists on employees to validate their ability to perform skills necessary for their job positions. Checklists can contain many skills for evaluation, though not every skill needs to be evaluated at once.

After all skills on a checklist have been completed, the entire checklist can be closed. Only the manager assigned the Checklist task is able to close the entire checklist.

To close a checklist:

1. Ensure that all skills within the checklist have been completed.
2. Click the **Close Checklist** button.

The **Close Checklist** button can only be selected once each skill on the form has been completed. A PDF copy of the completed checklist is added to the employee profile.

Self assessments

Self assessments for checklists are exactly what you might think they are: a chance for employees to rate themselves on the skills contained within a checklist. Employees are assigned a **Checklist - Self Assessment** task that requires them to complete a checklist

Task	Task Title	Due Date	Assigned To	Employee	Employee Position	Employee Department
Checklist - Self Assessment	Mad cow evaluation checklist	04/01/2016	Colwell, Christian	Colwell, Christian	Administrative Systems Analyst	Administration

The employee view of the checklist is the same as managers and validators. They have the opportunity to select a **Rating**, **Validation**, and **Population** for each skill, and provide additional comments if desired.

Once completed, employee responses in the checklist are viewable by managers and validators working in the checklist. A little person icon next to the assessment fields indicates the employee's selection, and their comments are shown at the bottom of the form as well.

Assessments:

<p>* Rating:</p> <p><input checked="" type="radio"/> Performs competently & independently</p> <p><input type="radio"/> abcd</p> <p><input type="radio"/> Rating Item with Comments Not Required</p>	<p>* Validation:</p> <p><input checked="" type="checkbox"/> Direct Observation</p> <p><input checked="" type="checkbox"/> Peer evaluation</p> <p><input type="checkbox"/> Simulation/Return Demonstration</p> <p><input type="checkbox"/> Patient/Customer Feedback</p> <p><input type="checkbox"/> Documentation</p> <p><input type="checkbox"/> Testing</p> <p><input type="checkbox"/> Policy Review</p>	<p>* Population:</p> <p><input type="checkbox"/> Infancy: Birth to 1 year</p> <p><input type="checkbox"/> Toddler: 1-3 years</p> <p><input type="checkbox"/> Preschool: 3-5 years</p> <p><input type="checkbox"/> School Age: 6-12 years</p> <p><input checked="" type="checkbox"/> Adolescent: 13-17 years</p> <p><input checked="" type="checkbox"/> Adult: 18-64 years</p> <p><input checked="" type="checkbox"/> Geriatric 65 yrs +</p> <p><input type="checkbox"/> Non Clinical</p> <p><input type="checkbox"/> Clinical</p>

Self Assessment Comments: Plenty of experience with this skill, no problem.

Assigning a self assessment

There are two ways to assign a self assessments task employees: automatically using a setting on the checklist schedule, or manually using a button on the checklist form itself.

Automatically via schedule

Automatically assigning self assessment tasks to employees is as easy as clicking a checkbox. The checklist schedule form contains an **Auto-assign self-assessment** option that, when enabled, automatically sends a self assessment task to the employee when the schedule becomes active.

*Title	<input type="text" value="Sharing floating plank skills"/> <small>The title will appear on the task list as it appears here, so make this a meaningful and unique description.</small>
*Checklist Type	<input type="radio"/> Annual based on employee's review date <input checked="" type="radio"/> Annual based on organization's fixed review period <input type="radio"/> Other such as introductory, interim, etc
*Frequency	<input checked="" type="radio"/> One task per employee per position <input type="radio"/> Only one task per employee regardless of the number of positions Select a checklist <input type="text" value="Primary"/>
Auto-assign self-assessment	<input checked="" type="checkbox"/>

Manually via button

For the manual task assignment, all managers have to do is click the **Send Self Assessment** button at the top of a checklist. This fires off that self assessment task to the employee.

Skill Checklist

100: Scheduler (Secondary) 

Click **Save** to save your progress. Click **Complete Checklist** to finalize all assessments and complete the entire checklist. Click [Laurel White](#) to view personal information.

Feedback

Feedback provides a way for managers to evaluate and inform employees of their performance and create action plans. Feedback is also a way to increase interaction between managers and employees, ensuring performance is on par with expectations and potential. The *Feedback* page is where you can send any praise, instruction, or warnings, via the Feedback form. Complete the form, then select the desired routing option to officially submit your feedback.

Revisit:	2/5/2018 <input type="text"/> ⓘ

Coaching Feedback Disclaimer text (Read Only)

To access the *Feedback* form for a specific employee, navigate to your *Employee List*. Locate the desired employee in the list, then select **Feedback**, found under the *Add* drop-down menu. This displays the *Feedback* page.

The screenshot displays the 'Employees' section of the HealthcareSource system. The breadcrumb trail indicates the user is viewing 'Brian's Abernathy's Direct Reports'. A search bar contains the text 'an'. Below the search bar, there are radio buttons for 'Direct reports' (selected) and 'All reports'. A table lists six employees: Christian Colwell (CC), Anne Jones (AJ), Pankaj Kukkar (PK), Andy Long (AL), Meagan Lynch (ML), and 51379 Manager (5M). Each row has an 'Employee File' column with 'View' and 'Add' buttons, and a 'Settings' column with a lock icon and a refresh icon. A dropdown menu is open for the 'Add' button of the first employee, showing options: Note, Feedback (highlighted), Development Goal, Document, Succession, Send Survey, and Development Plan. At the bottom, there are status messages: 'Employee is not registered.', 'Account Unlocked/Locked', and 'Refuse to sign enabled/disabled'.

Feedback types

There are three types of feedback:

- **Positive.** Used to praise employees for quality work efforts.
- **Coaching.** For those occasions when an employee requires additional training or instruction. Coaching isn't necessarily negative feedback; rather, an opportunity to improve.
- **Corrective.** Used when an employee has performed poorly, disregarded policies, etc. Corrective feedback is required to be reviewed by Human Resources before it is sent to the employee.

Employees receiving feedback from their manager are assigned a task to review and comment on the feedback. Managers then review employee comments and sign off, at which point a PDF of the feedback is added to the employee's record.

Note: Employees may *respond* to feedback issued by their managers, but they can not *initiate* feedback to their managers.

Feedback status

The status of a feedback item helps identify where it is in the workflow process.

- **Pending.** Feedback has been created by manager, but not sent to employee or routed.
- **Routed.** Manager has sent the feedback to a routing user for approval.
- **Routing Approved.** Routing has been completed and the feedback is with the manager to complete the routing by sending it to the employee.
- **Employee Review.** Feedback has been sent to the employee for review.
- **Manager Review.** Employee has either signed the feedback with comments or rejected the feedback.
- **Closed.** Task/workflow is complete.

Feedback Routing Options

Send for Review. Submits the feedback to any applicable stakeholders (i.e. Managers) for their review and further action.

Send to Employee. Submits the feedback to the Employee for their own review and further action.

Save. Saves the feedback form as a draft, but does not submit it.

About the Feedback form

The Feedback form contains several fields to capture necessary information and desired action items for the employee.

Some text fields include a **Suggested Text** link under the field name. Clicking this link opens a pop-up window that contains standardized comments based on the field. It is not necessary to use any suggested text; comments can be directly entered into these fields.

Feedback form details

- ***Date of Occurrence.** The date that the event occurred that led to the feedback. Check the **Not Applicable** option if no specific date is available.
- ***Type.** Drop-down list containing the different types of feedback (Positive, Coaching, Corrective).
- ***Notification.** Determines the type of notification the employee receives regarding the feedback.
- ***Title.** Drop-down list containing available titles for the feedback. The contents of this list is determined by the

Type of feedback being left.

- **Situation/Task.** Describe the situation/task/event that led to the feedback being left for the employee.
- **Action Taken.** Describe the action taken after the situation/task/event occurred.
- **Expected Result.** Describe the desired outcome of the feedback. This includes potential training, disciplinary action, or accolades (depending on the type of feedback).
- **Comments.** Field for any additional comments necessary for the feedback item.
- **Associate a Document.** Documents can be associated with the feedback left for an employee. Documents can be added to the feedback by uploading from a local computer or selecting from the list of documents that exist in the employee's profile.
- ***Discussed with Employee.** The date the manager discussed the feedback item with the employee.
- ***Due Date.** The date by which the employee must address the item.
- **Revisit.** The date the manager wishes to readdress the issue.
- **Created By.** The user that created the feedback for the employee. This is an auto-populating read-only field.
- **Created Date.** The date the feedback was initially created. This is an auto-populating read-only field.
- **Last Modified By.** The user that last made any modification to the feedback, including sign-offs. This is an auto-populating read-only field.
- **Signature.** Lists those users that have reviewed and signed off on the feedback. This is an auto-populating read-only field.
- ***Send To.** Field used to select a user to route the feedback to for review before being sent to the employee.
- **Comments.** Field for any additional comments necessary for the feedback item, or special notes for the user the feedback is routed to before employee review.

Adding Feedback

Managers are able to add feedback to an employee's record at any time.

1. Locate the desired employee from the *Employees* page and click the **Feedback** link in the table. The employee's *Feedback* page opens.

The screenshot shows the 'Employee List' page for 'Brian's Abernathy's Direct Reports'. The page includes a search bar with 'an' entered, a table of employees, and a dropdown menu for the 'Add' button. The dropdown menu contains the following options: Note, Feedback, Development Goal, Document, Succession, Send Survey, and Development Plan. A hand cursor is pointing at the 'Feedback' option.

Employee	Employee File	Settings
+ CC Christian Colwell	View - Add -	Account Unlocked, Refuse to sign enabled
+ AJ Anne Jones	View - Add -	Account Locked, Refuse to sign disabled
PK Pankaj Kukkar	View -	
+ AL Andy Long	View -	
ML Meagan Lynch	View -	
+ 5M 51379 Manager	View -	

2. Click the **Add Feedback** button. A blank feedback form opens.

Feedback

* Date Of Occurrence:	3/6/2017  <input type="checkbox"/> Not applicable
* Type:	Select Feedback Type ▼
* Notification:	Select Feedback Notification ▼
* Title:	Select Feedback Type First ▼
Situation / Task: Suggested Text	 0 / 3000
Action Taken: Suggested Text	 0 / 3000
Expected Result: Suggested Text	 0 / 3000
Comments:	 0 / 3000
Associate a Document:	<input type="text"/> ▼ (To upload additional files click here)
* Discussed With Employee:	<input type="text"/> 
* Due Date:	<input type="text"/>  ⓘ
Revisit:	<input type="text"/>  ⓘ

3. Complete the form as necessary.
4. Click the corresponding button for the action you wish to take.
 - **Save.** Saves a draft of the feedback; it is not sent for review or visible by the employee until further action is taken.
 - **Send to employee.** Saves the feedback and sends it to the employee for their review and signature.
 - **Send for review.** Saves the feedback and sends it for review. A pop-up window opens where a feedback rout-

ing user can be selected and additional comments can be added.

Clicking the **Send to employee** button creates a task for the employee to review and comment on the feedback. After an employee has signed off on the feedback, it is sent back to the manager for final review. Once the manager has signed off on the employee comments, the feedback is added to the employee's record.

Corrective feedback is required to be reviewed before it is sent to the employee; therefore, when corrective feedback is added, the **Send to employee** button is not available. The employee receives a task for the feedback after the selected routing user has reviewed and signed off.

Reviewing Feedback (routing user)

A task is created for users that have been selected to review feedback left for an employee. This task requires the user to review, comment, and sign off on the feedback. It is then returned to the manager for review, then sent to the employee.

1. Click the link for the feedback task in the Tasks table. The feedback form opens.
2. Review the comments left by the manager.
3. Make any necessary edits to the form.

Note: The ability to edit routed feedback forms is controlled by system-wide settings. You may not have the ability to edit the form, only comment and sign off.

4. In the **Correspondence** section, review the manager comments and add any additional comments in the **Response Comments** field. Comments left in this field are only viewable by the manager, not the employee.

Correspondence

From:	Mahendra Manager
To:	Big Boss
Comments:	Sheri's lunch breaks have been getting more and more out of hand. Action is needed.

From:	Big Boss
To:	Mahendra Manager
Response Comments:	I agree. Set something up and speak with her, and let me know if things change one way or another.
	98 / 500

Corrective Feedback Disclaimer text (Read Only)

Complete Routing Save Cancel

5. When finished review and commenting on the feedback, click the **Complete Routing** button.

Clicking the **Complete Routing** button signs off on the feedback and sends it back to the manager for review. Managers can then send the feedback to the employee for review.

Refuse to Sign

A **Refuse to Sign** option is available that provides employees with the ability to refuse to sign off on feedback left by their manager.

When this option is enabled for an employee, an additional **Refuse to Sign** button is available at the bottom of the feedback form when performing their **Review Feedback** task. Clicking this button sends the feedback to the manager without signing off.

Signature

Name	Christian Colwell
Date	3/6/2017
Comments	
	0 / 1000

I understand that my electronic signature carries the same legal weight and authority as my written signature.

Sign Refuse To Sign Cancel

Employees can still leave **Comments** even if they refuse to sign off on the feedback. Any text entered into the **Comments** field is displayed to the manager.

When an employee refuses to sign off on feedback, the form is sent back to their manager as a **Refused to Sign: Feedback** task. Managers are required to review the feedback form and sign off to complete the task. The Signature section of the form notes that the employee selected the **Refuse to Sign** option for the feedback, and displays any comments left by the employee.

Signature

Name	Christian Colwell
Date	3/6/2017
Comments	I don't agree with what was said about my punctuality and attendance. Let the record state I think this evaluation is a bundle of malarkey. <div style="border: 1px solid #ccc; height: 40px; width: 100%;"></div>
	139 / 1000

I understand that my electronic signature carries the same legal weight and authority as my written signature.

Notes

Notes are a watered-down version of Feedback and meant to serve as reference items for managers. Notes do not get routed to the employee or other users for comment; they are visible only to the manager that left the note for the employee. To create a new note, navigate to an employee's *Feedback* page, then click **Add Note**, found just under the **Search** bar. This displays the *Add Manager Notes* modal window.

Add Manager Notes
✕

Instructional Text for Feedback Notes (Read Only)*** The notes entered in this section are only visible to managers and HR. Employees do not have access to these notes. Please bear in mind the notes are discoverable and should be objective.

Save & File
Save As Draft

The *Notes* form only has three fields for capturing information.

- **Date of Occurrence.** The date that the event occurred that led to the note. Check the **Not Applicable** option if no specific date is available.
- **Title.** Drop-down list containing available titles for the note.
- **Situation/Task.** Describe the situation/event that led to the note being created for the employee.

The **Save as Draft** button saves a draft of the note, which can be found on the main *Feedback* page. **Save and File** adds the note to the employee's record. Once the note is filed, its status updates to **Closed** and it can no longer be edited or deleted.

Compensation

Compensation provides an easy way for organizations to compensate employees fairly and simplify the merit increase process. This powerful tool helps you prepare for your merit increase cycle quickly and accurately, and helps managers align compensation directly to employee performance.

Merit guidelines in the compensation worksheet take into account current performance, the employee's place in the salary range, and/or their compa-ratio. Managers can quickly review past salary information and current performance ratings, and use this information to make accurate, objective adjustments to their employees' compensation.

After any merit adjustments have been made, the worksheet is routed to other managers and stakeholders for approval using the compensation workflow feature. Once the worksheet earns all its necessary approvals, the employee is ready for payroll processing.

Note: Access to the compensation worksheet is controlled by system settings and user permissions. If you don't see the Compensation option, then your system may not be enabled with the compensation module, or you may not have the necessary permissions to access the worksheet.

About the compensation worksheet

The *Compensation* page can be found by clicking the **Compensation** link under **My Folder**. A Compensation Worksheets table displays all available worksheets for open compensation cycles.

Compensation Worksheets

Cycle Name	Start Date	End Date
CompCycle 1 - Phase 1	10/01/2044	12/31/2044
Current Comp Cycle	10/03/2013	10/03/2044

Worksheets can also be accessed using tasks that are assigned during the compensation workflow.

On the *Compensation Worksheet* page, cycle and budget information is displayed at the top of the page, and the actual compensation worksheet is shown in a table format.

Compensation Worksheet - Brian Abernathy

CompCycle 1 - Phase 1

Increase Budget		Bonus Budget	
Total	\$126,549.00	Total	\$45,000.00

Hourly Merit Increase					
Lump Sum Percent	0.00%	0.00%	23.75%	0.00%	0.00%
Lump Sum Amount	<input type="text" value="\$0.00"/>	<input type="text" value="\$0.00"/>	<input type="text" value="\$5,000.00"/>	<input type="text" value="\$0.00"/>	<input type="text" value="\$0.00"/>
Effective Lump Sum Amount	\$0.00	\$0.00	\$5,000.00	\$0.00	\$0.00

Cycles

The **Cycle** drop-down list at the top of the *Compensation* page allows you to select a compensation cycle for the worksheet. Only those employees that fall under the selected cycle are displayed in the worksheet.

Cycle

The system displays a message if a cycle is selected that has already closed, or if the current user does not have any employees that fall under the selected cycle.

Budgets

There are two budget sections available for compensation worksheets: **Increase Budget** and **Bonus Budget**.

Increase Budget		Bonus Budget	
Total	\$126,549.00	Total	\$45,000.00
Amount Allocated	\$88,059.76	Amount Allocated	\$29,500.00
Remaining Balance	\$38,489.24	Remaining Balance	\$15,500.00

- The **Increase Budget** section displays the total budget available to you for your employee merit increases, the total amount you have currently allocated in the worksheet, and the remaining balance available for additional increases.
- The **Bonus Budget** section displays the total budget available for one-time bonus payouts to employees on your worksheet. This section also tracks total, allocated, and remaining amounts.

Note: Bonus budgets are an optional feature for compensation worksheets, and may not be available depending on your system configuration.

These areas automatically update in real-time as you make adjustments in the worksheet. If you allocate increases that exceed your overall budget in either area, the system displays a warning and does not let you save the worksheet until necessary adjustments are made.

Worksheet table

The compensation worksheet itself is displayed in a table that allows easy access to information and fields for increases. The table itself is broken up into different sections.

Approvals

	<u>Kathleen Kelter</u>	<u>Mike LaPointe</u>
Manager Approval	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Senior Manager Approval	<input checked="" type="checkbox"/>	<input type="checkbox"/>
HR Approval	<input type="checkbox"/>	<input type="checkbox"/>
Notes		

The top of the worksheet contains several checkboxes that are used when managers have reviewed and approved changes for an individual. When all necessary approvals are received, the employee is ready for payroll processing.

Also in this area is the **Notes** feature, which allows managers to add new and view existing notes to employee compensation records.

Employee Data

Employee Data		
Employee ID	1033	1018
Hire Date	1/30/2006	12/5/1988
Position	Misc Position 67	Administrative Systems Analyst
Grade	14	5
Department	Big Department 10	Administration
Facility	Large Data Set	Healthcaresource
Performance Rating	Does Not Meet	Does Not Meet

This section of the worksheet contains basic employee information, such as **Hire Date**, **Position**, **Department**, etc. The **Performance Rating** field shows how the employee performed during the last appraisal period.

Current Pay

Current Pay		
Hourly Salary	\$43.26	\$18.25
Base Salary	\$89,980.80	\$37,960.00
Min	\$55,265.60	\$27,664.00
Start Q2	\$66,294.80	\$32,931.60
Mid	\$77,324.00	\$38,199.20
Start Q4	\$88,353.20	\$43,466.80
Max	\$99,382.40	\$48,734.40
Compa-ratio	1.16	0.99
Position In Range	Q4	Q2

This is a display-only section of the worksheet (meaning it contains no input fields) that shows current salary information for employees, as well as salary range information for that position in your organization.

The **Compa-ratio** field is calculated using the employee's current salary and the midpoint of their salary range. Salaries above their midpoint have compa-ratios above 1.0; salaries below the midpoint are below 1.0. **Position in Range** simply shows where the employee's current base salary falls in relation to the displayed salary range information for their position.

Merit

Merit		
Merit Guideline	0.00% - 0.50%	0.00% - 1.00%
Proration	100.00%	100.00%
Merit Percent	<input type="text" value="0.00 %"/>	<input type="text" value="0.00 %"/>
Merit Amount	<input type="text" value="\$0.00"/>	<input type="text" value="\$0.00"/>
Hourly Merit Increase	<input type="text" value="\$0.00"/>	<input type="text" value="\$0.00"/>
Lump Sum Percent	0.00%	6.59%
Lump Sum Amount	<input type="text" value="\$0.00"/>	<input type="text" value="\$2,500.00"/>

This section of the worksheet is where merit adjustments are made for employees. Fields allow you to adjust employee compensation through percentage increases, specific amounts, or lump-sum payouts.

The **Merit Guideline** field displays the system-recommended merit increase range based on the employee's rating and salary information.

Updates made in this area affect the amounts in the **Budget** section above the worksheet and the **Proposed Pay** section.

Depending on system configuration settings, error messages are displayed if increases made in this area are outside the guidelines or if the resulting salary is outside the salary range for the position.

Tip: When working in the **Merit** section of the table, it is recommended that you use either the **Merit Percent** or **Merit Amount** field for employees (as opposed to completing both fields for each employee). This consistency helps with tracking total budget expenditure.

Note: When working with fields in the **Merit** section of the worksheet, changes to fields automatically trigger real-time recalculations of other fields - such as those found in the **Increase Budget** and **Proposed Pay** sections of the worksheet.

Proposed Pay

Proposed Pay		
New Salary	\$89,980.80	\$37,960.00
New Hourly Salary	\$43.26	\$18.25
New Position In Range	Q4	Q2
New Compa-ratio	1.16	0.99
Effective Date	<input type="text" value="12/31/2025"/> 	<input type="text" value="12/31/2025"/> 

This area displays the resulting salary information for the employee when updates are made in the **Merit** section of the worksheet. Updated in real-time, it shows the **New Salary**, **Hourly Salary**, **Position in Range**, **Compa-ratio**, and **Effective Date** for a given employee.

Bonus

Bonus	
Bonus Amount	<input type="text" value="\$2,500.00"/> <input type="text" value="\$1,500.00"/>

The **Bonus** area of the worksheet allows you to distribute one-time bonus payouts to employees. The **Bonus Budget** section above the worksheet automatically updates in real-time when these fields are changed.

Completing a worksheet

Managers with direct reports need to complete the compensation worksheet in order to provide necessary merit increases for their employees. Completed worksheets can then be submitted for review and approval.

Managers receive a **Compensation - Worksheet** task when a cycle becomes active. Worksheets can also be opened from the *Compensation* page under **My Folder**.

1. Locate the employee(s) to review in the table. You can use available filters and sorting to narrow the results displayed in the table.
2. Make necessary adjustments to the [Merit section of the worksheet](#) for the desired employees. Make sure to check the **Increase Budget** area to ensure you're within the budget limits.

Merit		
Merit Guideline	0.00% - 0.50%	0.00% - 1.00%
Proration	100.00%	100.00%
Merit Percent	<input type="text" value="0.00 %"/>	<input type="text" value="0.00 %"/>
Merit Amount	<input type="text" value="\$0.00"/>	<input type="text" value="\$0.00"/>
Hourly Merit Increase	<input type="text" value="\$0.00"/>	<input type="text" value="\$0.00"/>
Lump Sum Percent	0.00%	6.59%
Lump Sum Amount	<input type="text" value="\$0.00"/>	<input type="text" value="\$2,500.00"/>

3. Click the **Send for Approval** button. This opens the Send for Approval pop-up window.

4. Select a user to route the worksheet to for approval and add any additional Comments as necessary. Click **Send** when finished.

After sending the worksheet, the **Manager Approval** option on the worksheet is automatically checked, and the worksheet is sent to the selected routing user as a **Compensation - Approval** task.

You can also click the **Save** button at any point when working on the worksheet to save your current progress without submitting it for approval.

Approving a worksheet

After a manager has completed a compensation worksheet, it is routed to additional users for review and approval. These employees, usually senior managers and HR, receive a **Compensation - Approval** task that requires them to review the worksheet to determine if it meets all applicable company guidelines and/or requirements.

1. Click the **Compensation - Approval** task from your task list. This opens the worksheet.
2. Review the worksheet to determine if it falls within the guidelines set for merit increases for your company. Make any necessary edits to the worksheet.

Once you have finished reviewing the worksheet, you have a few different options for your next step. Depending on how your compensation system is configured, the following action buttons may be available under the worksheet:

- **Save.** This saves your current progress on the worksheet if you made any edits. This does not submit the worksheet for any approval.

- **Send for Approval.** Allows you to route the worksheet to another user for review and approval before final processing. The **Senior Manager Approval** option on the worksheet is automatically checked once sent if you are the manager of the worksheet's compensation manager.
- **Reject.** Rejecting a worksheet sends it back to the compensation manager for further edits. Rejecting a worksheet requires you to enter comments.
- **Complete.** Users with necessary permissions can complete the review and approval process with the **Complete** button, which finalizes the worksheet. The employee receives a **Sign Compensation Summary** task that only requires them to review their compensation and provide signoff.

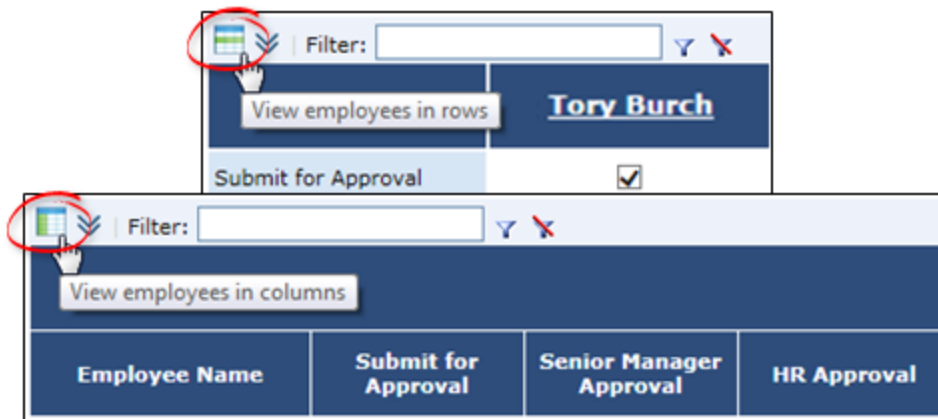

More about Compensation

Worksheet view options

The compensation worksheet offers several options to modify how data in the table is displayed, enabling you to quickly locate information and complete the worksheet.

Column/row view

The **column/row** viewing option toggles the layout of the worksheet between columns and rows. Using the toggle button (📄) located above the worksheet, you can switch between having the employees listed across the top of the table (the default view) and having them listed down the first column of the table. This allows you to view more records at once if you have multiple employees on your worksheet.

Filter

A filter field above the table performs partial-word searches to help narrow the results displayed in the table. The filter

searches against **Employee Name**, **Employee ID**, **Position**, **Department**, and **Facility**.

Enter a search string into the text box above the compensation worksheet and click the filter icon (Y). The table then shows only those employees that match the text entered in the filter.

	Tory Burch	Heather Daniels
Submit for Approval	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Senior Manager Approval	<input type="checkbox"/>	<input type="checkbox"/>

Clicking the clear filter icon (X) removes the filter and returns to the default view of all employees.

Hide/Show Details

Clicking the hide/show details button (⌵) in the upper left of the compensation worksheet toggles the view of many static rows of the table. This allows you to view just those fields necessary to make adjustments and the ones that are automatically updated when changes are made.

When details are hidden, the many fields from the **Current Pay** section are not displayed, and the entire **Employee Data** section is removed from the table as well.

Paging

Options for paging are available at the bottom of the table. The drop-down menu allows you to set how many employees are displayed in the table at one time. You can also select a page number to jump directly to that page of employees.

Approvals

The approvals feature for compensation worksheets allows **Managers**, **Senior Managers**, and **HR** to review submitted worksheets.

- Manager approvals are conducted either by the direct manager of the employee, or by a designated compensation manager at your organization.

- The Senior Manager approval provides the ability to approve submitted worksheets after upper management has completed their review. Once the Senior Manager checks the approval option, the worksheet is available for final review by HR.
- The HR approval occurs after a worksheet owner has submitted the worksheet for review and has been approved by a Senior Manager. HR approvals indicate the worksheet is ready for payroll processing.

Administrators are the only user role that can “unapprove” a Senior Manager approval and “unsubmit” the worksheet, allowing the worksheet owner to make edits. HR approval must be removed before Senior Manager approval can be removed. Likewise, Senior Manager approval must be removed before **Manager Approval** can be unchecked.

Notes

The **Notes** feature on the compensation worksheet, located in the Approvals section, provides an area to leave notes about an employee. These notes are viewable by approving managers, so can be used to provide justification for submitted employee merit levels.

The icon displayed in the **Notes** field indicates if a note has been created for that employee. An add icon () means no note is available, while a notes icon () means a note currently exists.

Hovering the cursor over the notes icon displays the note text in a tooltip. Clicking the add icon opens a notes window where you can enter text for the employee note and save it to the worksheet.

Notes

Kimberly Holdcroft

Kim had a great year for us, deserves a bonus in addition to the merit increase.

Save Cancel

Reports

The **Reports** area provides access to all the system reporting tools available for viewing and extracting defined data in Performance Manager.

Performance Manager provides a wide range of reports so you can easily gather and examine the data you need to ensure your employee management is efficient and successful. Each report provides several data filters, allowing you to manipulate your results without the need of sifting through records you don't need.

The **Reports** area contains several sub-pages:

- [Standard](#). Standard reports include all the pre-packaged reports offered in Performance Manager. The reports found on this page are diverse and address many of the data needs for users.
- **Appraisal Status Reporting**. This report displays the status of appraisals throughout your organization to help track where deficiencies exist in the appraisal process. This is similar to the *Appraisal Status* Standard Report, but the version of the report on this page allows a greater degree of flexibility and customization of data views, filters, and other details.
- **Checklist Status Reporting**. This report displays the status of checklists throughout your organization to help track where deficiencies exist in the checklist process. This is similar to the *Checklist Status* Standard Report, but the version of the report on this page allows a greater degree of flexibility and customization of data views, filters, and other details.

Available Reports

The *Standard Reports* page lists the reports available down the left-hand side of the page. Clicking a link opens the search filters for that report and allow you to run the report.

The list is organized by category, with related reports shown under each heading.

Appraisals

- **Appraisal and Goal Status**. Displays the completion status and summary information for all the appraisals and goals in a given date range.
- **Annual Appraisal Review Date**. Lists employees and their annual review due date.
- **Appraisal Status**. Displays the overdue or completion status and summary information for all appraisals in a given date range.
- **Employees Without Appraisals**. Lists employees who have not had an appraisal within a given date range.

- **Performance Distribution.** Displays distribution of performance scores along with the list of relevant employees and performance score information.
 - **Self-Appraisal.** Lists self-appraisals and completion dates for employees and managers within a given date range.
-

Checklist

- **Employee Checklist Status.** Displays all the training competencies that have been completed by employees in a department or group of departments. This report can be filtered based on departments or date range.
-

Compensation

- **Compensation Approval Status.** Displays employees and whether or not compensation changes have been submitted for approval.
 - **Compensation Detail.** Displays employee-level detail for selected compensation cycles within facilities and departments.
-

Feedback

- **Feedback Detail.** Displays employees who have received feedback within a given date range, along with feedback details such as type, notification, and action taken.
 - **Recognition and Remarks Detail.** Displays employees who have received recognition within a given date range, along with details such as facility, manager, department, approval status, and organizational values exemplified.
-

Feeds

- **Feed Detail.** Displays details on feed files processed within a given date range and lists errors for easy troubleshooting.
-

Miscellaneous

- **360 Summary Report.** Displays an employee's detailed responses to a selected 360 Review survey.
 - **Development Plan Status.** Displays the details of development plan tasks that are either pending, open, or completed, within a given date range.
 - **Document Status.** Displays the details of review document tasks that are either completed or outstanding, within a given date range.
 - **Employee Census.** Provides a list and totals of positions, employees, and FTE's.
-

- **License and Certification.** Displays employees who have licenses and/or certifications on record for a given date range.
-

Performance Goals

- **Goal Completion Status.** Displays a rollup of goal status for a given date range, along with details on individual goals.
 - **Goal Task Status.** Displays status of goal tasks for a given date range.
-

Succession Planning

- **9 Box Succession Planning.** Displays performance vs. potential for a given date range, including details for each employee.
 - **Succession Planning Detail.** Displays succession planning details for each employee within a given date range.
-

Tasks

- **Non-Appraisal Task Status.** A filterable report capable of delivering a wide range of task information.
-

Viewing reports

Viewing reports in Performance Manager is a simple matter of selecting the desired report and setting available filters for your data.

1. Locate the report you wish to view from the list on the left side of the page.
2. Click the link for the name of the desired report. The page will load the available filters for the report.
3. Select the desired filters for the report using the available fields.

Note: Available filters may vary from report to report based on the type of report you are running.

4. Click the **Generate Report** button.

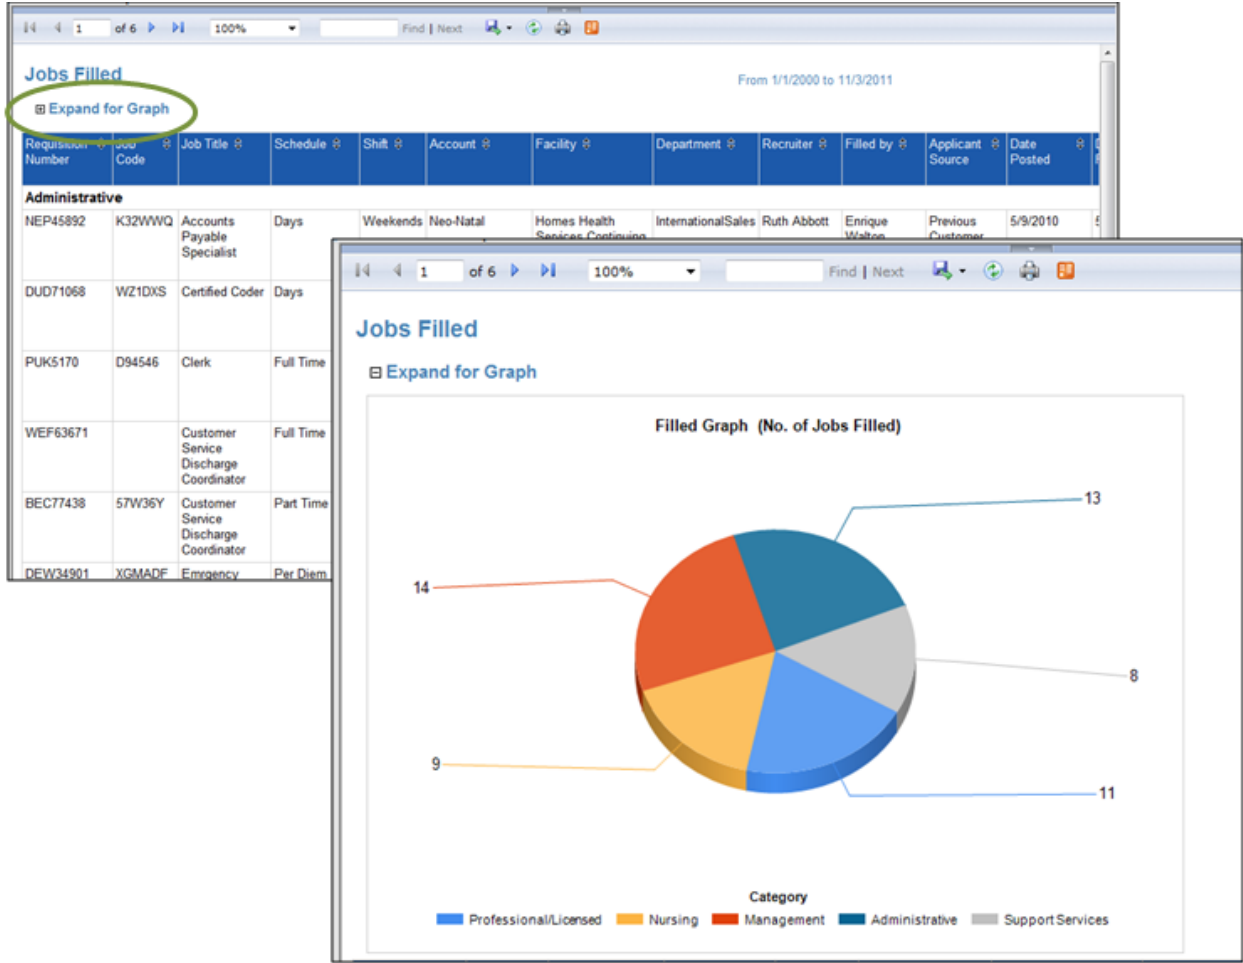

Clicking the **Generate Report** button loads the report in the main viewing area where the filters were displayed.

If you wish to update the filters for a custom report, click the **Back** button under the report. This re-opens the *Filters* page. Make any necessary adjustments to the filters then click **Generate Report** to re-run the report.

Report Graphs

All reports in Performance Manager provide a table view of the requested data. In addition to this table view of your data, some reports may also offer a graphical view of the information.

Graphs are automatically available on a select set of reports. If the report you are running is able to produce a graphical representation of your data, you will see an **Expand for Graph** link above your report results table. Clicking this link displays the graph view of your report results.

Tip: If you want to include the graph of your data when exporting the report to a file, make sure the graph is expanded and visible in your screen view. If the graph is not expanded, it will not be included in your export.

Report Data Latency

In an effort to increase the overall responsiveness of Performance Manager, reports are actually run against a copy of

the databases that hold your data. Using a copy of the database allows better optimization of the reporting application, provides greater system stability, and develops a software foundation necessary for effective custom report building.

So what does this mean for your reports?

Since information isn't being pulled directly from the working databases, it must be copied to the reporting database at set intervals (every 15 minutes, in this case). That means the information you are seeing in your reports will never be more than 15 minutes behind what's actually in the system.

If you want to see just how recent your report data is, you need look no further than the footer of the report. There you will find a line that states:

"Data current as of MM/DD/YYYY HH:MM:SS"

The date and time displayed in this line indicates the last time data was copied to the reporting database - or, how recent your report data is.
